100% MADE IN ITALY

REG/lass**ULTIMATE COMPOSITE TECHNOLOGY****REG/lass VIDEO****PATENTS:**

The Clean Cap system protects the end of the pole sections from accidental damage due to misplaced alignment and cleans out the inner female joint every time you unship. Also will stop your sections sinking if dropped into the water.

Fusion is two high modulus carbons fused together as one whilst wrapped on the mandrel. The end result being ultra rigid top kits with no tip bounce, allowing the angler to hit lightning fast bites with ease.

A carbon and resin treatment providing an anti-friction finish that enables the pole to be shipped with incredible ease during wet or dry conditions. This revolutionary surface not only adds strength, but also protects the overall fishing action during hot and cold temperatures.

The first ever formulation of its kind. Exclusive to Reglass production. Nanolith provides unique characteristics of vibration, damping & high strength. The Nanolith is an exceptional molecule, it's a thousand times smaller than a single carbon wire, and creates a bond at atomic level between fibre and matrix.

Super toughened epoxy resin. Developed by Reglass. Following the success of Sun Core, we have modified the molecular structure of Sun Core and enhanced the mechanical performance of the pre-preg. The Super toughened epoxy resin formulation gives an extremely elegant and innovative black colour finish.

High Tensile carbon fibre M55 HS and Ultralight multiwall System 2 M5 classified: **Competition, All round, Carpodrome**. High Tensile 500 grade carbon fiber Black Core S.V.Er Super vibrational damping epoxy resin.

High Modulus carbon fibre M76 HM and Ultralight multiwall System 2 M7 classified: **Competition, All round, Carpodrome**. High Tensile 760 grade carbon fiber Black Core S.V.Er Super vibrational damping epoxy resin.

Very High Modulus fibers M87 HMS and Ultralight multiwall System 2 M8 classified: **Competition, All round**. High grade 870 carbon fibre Black Core S.V.Er Super vibrational damping epoxy resin.

Very High Grade Pitch Modulus fibers M90 HGS and Ultralight multiwall System 3 M9 classified: **Competition**. Super high 1000 grade carbon fibre and P90JS Black Core S.V.Er Super vibrational damping epoxy resin.

A special resin finish that enables the pole to be shipped incredibly smoothly & quickly. It's applied from sections 5 to the 13m butt section on many of our poles.

This clever technology provides the angler with a silky smooth elastic system. A series of teflon coated inner steps prevents the elastic from making contact with the inner wall of the pole sections.

To increase the technical performances we have engaged a resin system that was used into the aerospace industry, the "Super vibrational damping epoxy resin". The vibrations damping inside the composite structures allow high reactivity products.

The ultimate pre-preg concept. This new resin strongly bonds the carbon fibres & provides the ultimate fishing action.

A fine wrap of pure teflon bonded directly onto the male joints, substantially reducing carbon to carbon wear. A simple twist locks the sections in place. We are the only manufacturer in the world that has this innovative feature.

SLOT SYSTEM: Really a new system that is actioning during the fighting moment: this system is permitting us to pull the elastic in the stronger and faster way in order to have a quicker landing of the fish, even if is a real big one.

AB TIP: Ab tip system is permitting to the last kit part to become stronger, stiffer and faster. The tip hole is even bigger in order to use hollow elastic and cones. In this way tip and section B are melted inside a unique spare!

This really delicate past moment brought us to rest far away for a long time from the match venues and this sad removal bring the desire to come back (in the competitions) to grow a lot inside myself and ,i am sure, inside all the competitor anglers. Finally we had recently the possibility to see again ourselves on the banks and to compete in different ways and styles as in commercial waters as sometimes in the natural ones... paying all the attentions needed in the present moment, but with the great wish to live once again our great passion, better and stronger than before ! With the correct evaluations of the present times, I would want to work near my colleagues and in combination with the super professional Reglass engineers in order to build up and create a new pole , kits and accessories range and to bring them to the anglers and fishermen disposals: this range is dedicated to the current period and tendency and I would want to dedicate myself as to the development of a super commercial range as to some tackles dedicated to the highest competition levels in natural waters: channels, rivers, big lakes etc , where we are forced to have in the hands simply the most performant rods and kits.

Once again I really hope that you will "fish with me", with my brand and my range, appreciating what I realized thanks to my passion and my professionalism, taking your occasion to select something that I was able to create and to put a disposal to all the passionate competitors.

The top of the series for the competition poles in the 2020-2021 season: developed in order to fully satisfy the competitor who is searching for a complete, top quality and reliable pole in order to perform every kind of match and situation! It is super stiff and incredible ready for strike in each moment! Made by the highest carbon module M9 that is permitting us to create a lightweight pole that is anyway able to support heavier kits when the situations are asking to perform and fish with stronger tackles.

A stiff, strong but really handy pole: ideal for the angler who want the best quality carp pole that presents anyway the characters of a really nice top-match pole. 100% reliable in any situation you will fish with. Even on this one we can use any kind of kit we want, from the lightest ones to the carp, stronger ones when we need to fish (just for example) in fast stream channels or in the fisheries chasing for big carps or when we have to fight and catch a lot of fishes. It is realized with the same mandrel of the 9901 so it is totally interchangeable with the "biggest system".

The MVR MATCH is built with the technology of 2 parallel handles, that permits us to realize super stiff poles but in the meanwhile really really balanced ones. You will appreciate a lot this allround pole that is the ideal tackle as for the channles and rivers as for commercial waters. The carbon fibers used for build this super tackle are the M80 ones that are simply the best in order to create the high quality and super balanced poles.

This is the system of MVR MATCH: 2 parallel handles and specifically studied for the highest stresses and the quickest movements during the sessions or competitions. Do not be confused by the name "carp"...it will be really nice to have in the hands and the correct compromise between strength, balance and weight. The secret in order to create a pole like this is the engineering with particular high grade HM8105 carbon fibers that are granting the extreme strength of this new tackle!

The top of the series in the Commercial range: a specific range dedicated to the fisheries, carpodromes and strong use. GHOST 97 is studied in order to include itself characters as stiffness, balancing power and lightness that are all needed by the expert carp angler. It is a single handle pole reliable and nice to use: it can become a superlative pole for the winter times when you use the COMMERCIAL MATCHLITE kit, but in the same way it rests a super pole in the summer when we use the kits COMMERCIAL POWERLITE or the COMMERCIAL POWER and the POWERPLUS ones. In this last case, we suggest to combine these kits with the n°4 COMMERCIAL FORCE spare. This is simply the best choice you can do if you love to fish in commercial waters.

CODE	MT	Ø MM	TOT. CLOSED	SECTION N°	GR	€
8417B115	11.50	44	190	7 + MINI EXT	985	1.090,00

Rod for SPECIMEN fishing with two parallel handles in 11,50mt/10mt, expressly thought to be used in fishing big carps over 10 kg weight. The rod is composed with Mv-R specimen kits. For the manufacturing of the Golia Carp are used high tensile carbon fibers in H55 material, build up and in compression style.

NB: ALL THE MV-R KITS ARE COMPATIBLE WITH THE "SPECIMEN" POLE SERIES, ON THE 5TH ELEMENT OF THESE POLES.

This rod is a SPECIMEN pole really incredible!! It's designed expressly by Reglass to subject high stresses, like fishing sturgeons or catfishes. Into carbon fibers were inserted filament of Kevlar to make the rod much stronger, every piece has got a resistance to the compression incomparable, the rod is 11,5 meters long but with possibility to arrive at 13 meters with the related original spare .

NB: ALL THE MV-R KITS ARE COMPATIBLE WITH THE "SPECIMEN" POLE SERIES, ON THE 5TH ELEMENT OF THESE POLES .

This roubaisienne made by SUPER HIGH MODULUS CARBON FIBRE under compression combined to Pan fibers very resistant and super strong in the traction moments. This short pole made in Italy with a super reactive action, is developed for fish over sized fishes not only in lakes but even in open waters. Excellent finishing and it fits a monobrin tip and the newest MV-R Specimen kit.

NB: ALL THE MV-R KITS ARE COMPATIBLE WITH THE "SPECIMEN" POLE SERIES, ON THE 5TH ELEMENT OF THESE POLES.

We wanted to renew one of the best carp pole that we have created and sold from many year under the Maver brand. It is the best expression of the big fishes poles: quite big in the handle part because we wanted to make it super balanced and really handy. It is for sure the perfect pole for the anglers who wanted to start to fish with the roubaisienne style!. Also this pole is compatible with all the Mv-r pole kits.

The Maver team studied a lot the market and the european fishing styles and after that wanted to introduce a specific pole for the Specimen fishing style. The Moby Dick is simply the best pole that you can select and buy for this kind of fishing : these poles must support and work under very big stress, as for example lifting two kg of weight from the floor . It fits pole kits Mv-R x10 with that one we can fight and catch very big fishes using big hollow elastic without any problem. The Moby dick can fit on its second element all the Mv-r kits .

Entry level pole developed in order to fish carps in the rivers and in the fisheries as well : 13 mt of reliability and strenght combined with a balancing character that permits us to fish and compete in the proper and most comfortable way. The SUPER CARP X5 is originally proposed with the new REALITY K300 kit that could be anyway substituted with the k200 and k 100 when you need to pull and fight with bigger fishes or compete in the hardest conditions and when you need to fish with strong lines, hooks and tackles.

Short poles created for fish near the banks in the fisheries. Put over mini poles with the 2 sections kit interchangeable in all the lengths and for the whole range. On the B section there is the slot bush needed for the hollow elastics tension and for pull them during the fight! The highest module carbon fiber is used in combination with the newest resins generation in order to realize the strongest and most reliable short poles in the market!

MV-R KIT SERIES:

"PRESENTAZIONE
KIT MV-R"

The development Maver team decided to create a new very wide range of top kits in order to satisfy all the fishing needs, without any doubt or lack. The series is divided in 2 main families: the first is the Mv-R classic, through that we can find 6 series of kits (all without slot or drill) from the strongest to the lighter, from the stiffest to the softest. In fact with the Mv-R 050 we can pull with a lot of force fighting very hard while from the other side with the Mv-R 900, a kit without quality compromises, we wanted to build a superlative quality pole kit which is at the top level of the series for lightness and stiffness! The second series is called Mv-R x and it has got as first main character the presence of the slot on all the range. The slot presence is such popular today to be used not only for fight against big fishes but also for catch and search for the silver fishes and for many technical fishing sessions. Also the mv-r x range is composed by 6 models and on both the ranges (mv-r and mv-r X) is well written the elastic rearing that we suggest you as for the hollow elastics as for the solid ones.

COMMERCIAL KIT

A real new range composed by SLOT kits, totally developed and born for the commercial waters. A new AB tip profile was studied in order to have a superlative stiffness and reliability, even thanks to the highest carbon and resins quality. These are proposed and sold just in the length 2.55mt and they can be supported by the special spares as COMMERCIAL SILVERFISH and COMMERCIAL FORCE in order to be selected and used in all the deepest waters and fisheries. All the commercial kits have got the slot system and also the internal ptfе bush with external holes of 3,6mm and 4,8mm.

COMMERCIAL KIT MATCHLITE

NEW

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	€
8704K002	2	2.55	MAX 2.3 mm	160,00

The top of the series, indicated for fish as carass, f1, little carps and possible to be used for elastics up to 2,3mm.

COMMERCIAL KIT POWERLITE

NEW

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	€
8703K002	2	2.55	MAX 2.5 mm	149,00

A sensational high quality kit realized with super quality materials which permit us to have a super strong and stiff tackle with a lightweight sensation in the hands, ideal to support elastics till 2,5 mm

COMMERCIAL KIT POWER

NEW

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	€
8702K002	2	2.55	MAX 2.8 mm	140,00

The correct kit to be used where you need to catch a lot of fishes, rushing in the quickest way. It is supporting elastics till 2,8 mm and is incredibly stiff, reliable and light!

COMMERCIAL KIT POWERPLUS

NEW

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	€
8701K002	2	2.55	MAX 3.1 mm	115,00

With this kit you can catch many many fishes, in the quickest time and you can win the fight even with the biggest catches without any problem! The biggest carps will be your target with zero worries. Elastic rating up to 3,1 mm but we can of course use even bigger ones!

COMMERCIAL KIT CUPPING

NEW

CODE	SECTION N°	TOT. LENGHT	€
8700K002	2	2.55	105,00

COMMERCIAL SILVER FISH

NEW

CODE	CLOSED	MM	GR	€
0496700D	1.45	27	50	125,00

Light spare (4th section) built in order to increase the length of the 2020 commercial kits range. This is especially studied and suggestable for the kits commercial kit Matchlite and Powerlite.

COMMERCIAL FORCE

NEW

CODE	CLOSED	MM	GR	€
0496800D	1.45	27	68	109,00

Strong spare (4th section) built in order to increase the length of the commercial kit range 2020. This is especially studied and built for the commercial kit Power and Powerplus.

FIGHTER

Reinforced spares to be put on the related poles in order to fish shorter without push and break the original pole elements. These FIGHTER are realized with the same carbon fibers but with stronger laminations in order to handle them with force without the risk of damages and breakages, especially during the strike moments. Anyway, when you'll catch a big fish and you need to put more elements below these fighters, you can anyway use the original pole elements in order to fight properly!

FIGHTER N°4 - N°5 can be used on all the 2020 pole range and also with the past years ones !

FIGHTER X2 N°6 - N°7 can be used with the poles created in 2 parallel handles : as for the 2020 season as for the previous years ones (example MVR MATCH, MVR CARP, JURASSIC TRX3, JURASSIC TRX1, ENIGMA MATCH, ENIGMA CARP).

FIGHTER X3 N°6-N°7 can be used with the poles created with 3 parallel handles : as for the 2020 poles as for the previous years ones (example 9901, 9701, 991 MATCH, 991 CARP, etc.)

FIGHTER N°4 - N°5

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID	€
8500K002	1	1.74	MAX 3.1 mm	MAX 2.1 mm	95,00

The second Kit of series MV-R ghost is the Carp one, it's a monobrin Kit and is very innovative on the European market. It was designed specifically for fishing big carps on the surface, using shorter lines without any problem, and being very conical it owns an incredible stiffness fundamental for fishing with the pellet making noise on the water surface, a technique very popular in the european commercial waters.

KIT MV-R GHOST LIGHT

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID	€
8501K002	2	1.50	MAX 1.6 mm	MAX 2.3 mm	129,00

In collaboration with Maver Uk we decided to designed two kits for surface carpfishing with a special color 'Gun smoke'. The Ghost Light is the lightest of the series and perfect for catch medium size fishes like chubs and roaches. This kit is compatible with all the MV-R Kits range.

REALITY KIT

KIT REALITY K100

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID	€
8705K002	2	2.95	MAX 3.6 mm	MAX 2.6 mm	
8705K003	3	4.30	MAX 3.6 mm	MAX 2.6 mm	

Really strong Kit, ideal for fish with very big elastics, even with 3,6 mm diameter. Superlative in order to catch big fishes like carps, barbels, cat fishes, as in the big rivers, as in the fisheries or in big lakes. REALITY k100 has got the ab tip solution and we can pull and fight without any matter ! Available in 2 or 3 sections, it born with the reinforced little part that is ideal to create the slot version!

KIT REALITY K200

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID	€
8706K002	2	2.95	MAX 2.8 mm	MAX 2.3 mm	
8706K003	3	4.30	MAX 2.8 mm	MAX 2.3 mm	

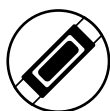

REALITY K200 is expressly indicated for fish in the carpodromes or in the rivers using big floats, medium or big diameter lines and elastics till 2,8 mm size. Reliable and super balanced it is perfect to fish also with the 13 mt pole. The kit is built with the ab tip and is available in 2-3 sections: the c section is made with the reinforced little part that is expressly born in order to put the slot bush on itself.

KIT REALITY K300

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID	€
8707K002	2	2.95	MAX 2.5 mm	MAX 2.1 mm	
8707K003	3	4.95	MAX 2.5 mm	MAX 2.1 mm	

REALITY K300 is an high level kit ideal for the fisheries with medium light floats and lines. For realize this very nice kit were used the best materials that makes it stiff, reliable and light in the same time. Perfect for fish with elastic till 2,5 mm diameter and ideal to fit with the top quality pole salso in order to compete at the top level ! Ab tip kit that is available in 2 and 3 sections: C section has got the reinforced little part where we can insert the slot bush.

SLOT SYSTEM: Really a new system that is actioning during the fighting moment : this system is permitting us to pull the elastic in the stronger and faster way in order to have a quicker landing of the fish, even if is a real big one.

AB TIP: Ab tip system is permitting to the last kit part to become stronger ,stiffer and faster. The tip hole is even bigger in order to use hollow elastic and cones. In this way tip and section B are melted inside a unique spare!
