REGGLASS VIDEO

TECHNOLOGY AND MATERIAL:

Reglass' products are a unique mix of complex technology and a broad range of material that result in in-house pre-preg layers. Pre-preg represent the first fundamental production step of Reglass' process, as a result of very precise impregnation of the carbon fibre by a matrix (epoxy resin). There are three main carbon fibre families, each owning precise properties (feature: High Strength (HS), High Modulus (HM) and Ultra High Modulus (UHM) fibres. To further enhance the mechanical characteristics of the fibres, Reglass has engineered its brand new epoxy resin formulations: Aerospace grade epoxy resin specially conceived, once bond to the carbon fibres, to maximally decrease the vibrations inside the composite. This particular matrix formulation permits the carbon fiber to absorb vibrations thus permitting the best action-reaction behaviour.

THE PROCESS - MATRIX AND FIBRE-REINFORCEMENT:

Reglass owns the control of the entire process, starting from the raw material, carbon fibres and the variety of epoxy resins in use, up to the final quality check. The ductile selection of aeronautic degree carbon fibres impregnated with proprietary matrix, is the first step of Reglass ®' in-house composite pre-preg production. The distinctive feature of Reglass "process consists in the faculty to align different types of carbon fibres in one pre- preg. The combination, aeronautic degree fibres + own pre-preg production ,leads to the construction of high structural poles that are not subject to breakages.

PATENTS:

The Clean Cap system protects the end of the pole sections from accidental damage due to misplaced alignment and cleans out the inner female joint every time you unship. Also will stop your sections sinking if dropped into the water.

Fusion is two high modulus carbons fused together as one whilst wrapped on the mandrel. The end result being ultra rigid top kits with no tip bounce, allowing the angler to hit lightning fast bites with ease.

A carbon and resin treatment providing an anti-friction finish that enables the pole to be shipped with incredible ease during wet or dry conditions. This revolutionary surface not only adds strength, but also protects the overall fishing action during hot and cold temperatures.

The first ever formulation of its kind. Exclusive to Reglass production. Nanolith provides unique characteristics of vibration, damping & high strength. The Nanolith is an exceptional molecule, it's a thousand times smaller than a single carbon wire, and creates a bond at atomic level between fibre and matrix.

Super toughened epoxy resin. Developed by Reglass. Following the success of Sun Core, we have modified the molecular structure of Sun Core and enhanced the mechanical performance of the pre-preg. The Super toughened epoxy resin formulation gives an extremely elegant and innovative black colour finish.

High Tensile carbon fibre M55 HS and Ultralight multiwall System 2 M5 classified: **Competition, All round, Carpodrome.** High Tensile 500 grade carbon fiber Black Core S.V.Er Super vibrational damping epoxy resin.

High Modulus carbon fibre M76 HM and Ultralight multiwall System 2 M7 classified: **Competition, All round, Carpodrome.** High Tensile 760 grade carbon fiber Black Core S.V.Er Super vibrational damping epoxy resin.

Very High Modulus fibers M87 HMS and Ultralight multiwall System 2 M8 classified: **Competition, All round.** High grade 870 carbon fibre Black Core S.V.Er Super vibrational damping epoxy resin.

Very High Grade Pitch Modulus fibers M90 HGS and Ultralight multiwall System 3 M9 classified: **Competition.** Super high 1000 grade carbon fibre and P90JS Black Core S.V.Er Super vibrational damping epoxy resin.

A special resin finish that enables the pole to be shipped incredibly smoothly & quickly. It's applied from sections 5 to the 13m butt section on many of our poles.

This clever technology provides the angler with a silky smooth elastic system. A series of teflon coated inner steps prevents the elastic from making contact with the inner wall of the pole sections.

To increase the technical performances we have engaged a resin system that was used into the aerospace industry, the "Super vibrational damping epoxy resin". The vibrations damping inside the composite structures allow high reactivity products.

The ultimate pre-preg concept. This new resin strongly bonds the carbon fibres & provides the ultimate fishing action.

A fine wrap of pure teflon bonded directly onto the male joints, substantially reducing carbon to carbon wear. A simple twist locks the sections in place. We are the only manufacturer in the world that has this innovative feature.

PATENTS:

The product development team is every day searching and studying not only the quality of the carbon fibers and the different materials but even the specific resins used for impregnate the same materials : in relation to the different tackles that we want to create we find out the best quality and the particular resins that permit us to obtain a certain result, a certain action and special performance. For decrease the breakages and grant the best curve to our rods we are now able to cross the resin process, making the same one various and multiple times in order to permit to the liquid to get inside the single fibers and especially into the coupled ones !!! A very delicate process but really new that is permitting us to develop and create the most reliable fishing rods on the market.

All the fishing rods are composed by multiple spares: doesn't matter if they are telescopic, put-over, put-in or spigot models. We have overpassed our experience reaching a real new target: the various sections of each rod must work together and concurrently in order to obtain the ideal action as during the casting action as during the fighting moment. We have hard worked on each spare connection, making a special ultrasonic ionization that permits us to give the best regular action from the various spares of each Maver fishing rod. Another big investment in order to grant to each customer who buy a Maver rod to own a perfect tackle, a fishing rod composed by many spares that are working together in the best checked and controlled way, giving a superlative feeling to the fisherman.

For some fishing techniques the rod tip is not important, is quite all...simply the most important spare ! Is the spare that defines the rod action and that grants the curve and the tackle performance, as during the cast as during the fight ! Is not so easy to produce the last rod spares in the best way but we are now able to obtain the desired target : advanced materials, new resins and cooking process calculated grade per grade in order to obtain fishing rod where tip and spare B are finally produced in order to present the best sensitivity and a perfect rod action. It was not easy and the investment was quite big but we can finally say to have now created tips, spares B and C of the best quality that are granting the best rod performance !

In order to obtain a perfect fishing tackle is very important that each step during the realization is well studied , checked and super controlled: we deeply wanted that the quality control at the end of each working process is realized and made from reliable technicians and engineers but especially must be closed thanks to computers and softwares , technologically advanced and able to check every single thing. Our informatic system is today able to grant us the best quality control in order to be sure to have perfect rods and tackles with the highest performances. You can be sure to have bought simply the best for your fishing sessions!

MAVER CARBON 90 is our best quality and reliability solution in order to create high performance fishing tackle ! High modulus carbon 90 in order to be able to create the best, lightest and high quality tackles. Our carbon and resin experience is known worldwide and is bringing us to develop perfect combinations in order to develop simply the best tackles and rods. MC90 is representing the best carbon solution of the highest grade for your fishing rods.

MAVER CARBON 70 is the Maver solution in order to create strong and reliable tackles but technical in the same time. High modulus carbon 70 in order to build the best quality tackles: light, performant and reliable. Our carbon and resin experience is bringing us to create the best mix and combinations of materials in order to create perfect quality rods, going through different fishing techniques and combining materials focusing on the different fishing tackles that we want to build up.

MAVER CARBON 50 Maver carbon 50 is our most reliable solution in order to create very strong and powerful fishing tackles : high modulus carbon 50 in order to create the best fishing rods , very powerful and strong ones. Our experience in technology and carbon materials are bringing us to understand the correct combinations for build up the specific rods in relation to the various fishing techniques!

SLOT SYSTEM: Really a new system that is actioning during the fighting moment : this system is permitting us to pull the elastic in the stronger and faster way in order to have a quicker landing of the fish, even if is a real big one.

AB TIP: Ab tip system is permitting to the last kit part to become stronger ,stiffer and faster. The tip hole is even bigger in order to use hollow elastic and cones. In this way tip and section B are melted inside a unique spare!

MATTEO PIRAZZINI

Every season which is passing through and every catalogue that i am going to launch, is representing for me a moment which is chaining me more and more to the proper manage of my company and especially is meaning a special moment where I can put even more energies and passion for the development of the products, for the study of all the single preparatory elements that are for sure basic and necessary in order to build up special items in order to satisfy at the maximum level all the anglers who are continuously following and choosing the Maver brand.

I love my work and the best thing for me is the awareness to have created a special collection, after a lot of team work , which I am sure it will be appreciated from all the anglers who have entrusted themselves into our colors, into all our products and ranges, into all the items that the Paioli sport company has put in the market through the seasons. Thanks to the big passion and the super experience which is coming from an ultra centenary company, I am here for meet , welcome and bring you with me in this huge world of the Maver new products, prepared for the incoming 2020 season!

Ingeneers of reglass company and Maver expert wanted to produce a great roubaisienne without compromises like this one the Superlithium pole, a strong point on the market for all anglers and fishermen. The Superlithium pole is made by the best materials Toray and resins of latest generation developed inside Reglass. The main features are the diameter ultra-slim and the lightness of this rod; at its maximum lenght of 13 mt this superlithium pole has a balanced weight of 3,550 kg, and this is one of the most light rod on the market. The stiffness of the pole will amaze you for sure!. To increase stiffness and strenght to the compression on connections of Superlithium pole it's inserted the Gm10 that is an aereospace material.

8416B013	13	43	189	8+MINI EXT	1036

This is our top 2020 model and it's for all those anglers that want the best for their competitions. Designed using just Very High Grade Pitch modules fibres M9 that gives to the 991 a stiffness and lightness ever seen. The rod's reliability during the fishing session is still the best because of its biaxial materials that gives the pole an high resistance to the compression! The 991 has not got any problem using carp kits.

This pole is a RBS with two parallel handles designed for fishing in car-podromes or using large dimension flat floats. The high grade HM8105 carbon fiber is used expressly for this development, and this rod was subjected to high grade of stiffness with aeronautical certification, that makes it indestructible.

We wanted to renew one of the best carp pole that we have created and sold from many year under the Maver brand. It is the best expression of the big fishes poles: quite big in the handle part because we wanted to make it super balanced and really handy. It is for sure the perfect pole for the anglers who wanted to start to fish with the rou-baisienne style!. Also this pole is compatible with all the Mv-r pole kits.

8402B115	11,5	46	1.75	7+ MINI EXT	840

The Eleven is a pole studied and built especially for the french , belgium and netherland markets where in some competitions and fisheries the 11,5 is the maximum length. This is usable really in all the fishing conditions and for fish all the fishes and agin in each venue ! You can fight against monsters using originally kit mv-r 100 or you can fit higher quality kits in order to fish lighter and more handly for technical sessions searching for roaches and bremes. In this way i twill be also extremely balanced and even light ! The relationship for such made in Italy pole is really superlative 100%.

MOBY DICK

MADE IN ITALY BY:

reglass

CODE	MT	Ø MM	TOT. CLOSED	SECTION N°	GR
8401B950	9.50	36	1.81	6	731

The Maver team studied a lot the market and the european fishing styles and after that wanted to introduce a specific pole for the Specimen fishing style. The Moby Dick is simply the best pole that you can select and buy for this kind of fishing : these poles must support and work under very big stress, as for example lifting two kg of weight from the floor . It fits pole kits Mv-R x10 with that one we can fight and catch very big fishes using big hollow elastic without any problem. The Moby dick can fit on its second element all the Mv-r kits .

MAVER KIT

MV-R KIT SERIES:

YouTube

"PRESENTAZIONE
KIT MV-R"

The development Maver team decided to create a new very wide range of top kits in order to satisfy all the fishing needs, without any doubt or lack. The series is divided in 2 main families: the first is the Mv-R classic, through that we can find 6 series of kits (all without slot or drill) from the strongest to the lighter, from the stiffest to the softest. In fact with the Mv-R 050 we can pull with a lot of force fighting very hard while from the other side with the Mv-R 900, a kit without quality compromises, we wanted to build a superlative quality pole kit which is at the top level of the series for lightness and stiffness! The second series is called Mv-R x and it has got as first main character the presence of the slot on all the range. The slot presence is such popular today to be used not only for fight against big fishes but also for catch and search for the silver fishes and for many technical fishing sessions. Also the mv-r x range is composed by 6 models and on both the ranges (mv-r and mv-r X) is well written the elastic reating that we suggest you as for the hollow elastics as for the solid ones.

Surrogate items to those of the rod to allow fishing in short distances, without having to put under strain the pieces of the rod itself. The Fighter were made with the same carbon fabrics and with reinforcing laminations to ensure you can be able to hold it without the risk of unpleasant breaks. This doesn't avoid you to insert the original elements of the rod, in the case of large fish. The Fighter Superlithium are for use on model 2016 to 2020.

CODE	SECTION N°	TOT. LENGHT	ELASTIC SOLID	ELASTIC HOLLOW
8500K002	1	174	MAX 2.1 mm	MAX 3.1 mm

The second Kit of series MV-R ghost is the Carp one, it's a monobrin Kit and is very innovative on the European market. It was designed specifically for fishing big carps on the surface, using shorter lines without any problem, and being very conical it owns an incredible stiffness fundamental for fishing with the pellet making noise on the water surface, a technique very popular in the european commercial waters.

KIT MV-R GHOST LIGHT **NEW**

CODE	SECTION N°	TOT. LENGHT	ELASTIC SOLID	ELASTIC HOLLOW
8501K002	2	150	MAX 2.3 mm	MAX 1.6 mm

In collaboration with Maver Uk we decided to designed two kits for surface carpfishing with a special color 'Gun smoke'. The Ghost Light is the lightest of the series and perfect for catch medium size fishes like chubs and roaches. This kit is compatible with all the MV-R Kits range.

KIT MV-R SPECIMEN **NEW**

CODE	SECTION N°	TOT. LENGHT	ELASTIC SOLID	ELASTIC HOLLOW
8600K003	3	150	MAX 3.0	MAX 4.2
8600K004	4	160	MAX 3.0	MAX 4.2

This Kit is for fishing big fishes like carps, sturgeons, catfishes and wels catfishes. We can put some hollow elastics on them until 4,2 mm diameter size. A reinforcement on each spare is assembled till the fifth section in order to build up the slot in a personal way.

KIT MV-R ULTRA SPECIMEN **NEW**

CODE	SECTION N°	TOT. LENGHT	ELASTIC SOLID	ELASTIC HOLLOW
8601K003	3	150	MAX 5.0	MAX 6.5
8601K004	4	160	MAX 5.0	MAX 6.5

It can be used for fishing all those fishes belonging to the category 'monster', like carps, sturgeons, catfishes also over 20 kg. We can use hollow elastics on this kit till 6,5 mm size, a real no-limit tackle! A reinforcement on each spare is assembled till the fifth section in order to build up the slot in a personal way.

AB TIP MV-R BRUTALE **NEW**

CODE	SECTION N°	TOT. LENGHT	ELASTIC SOLID	ELASTIC HOLLOW
8602000A	1	155	INFINITE POWER	INFINITE POWER

A Big tip studied especially for using 3 mm hollow elastics or even superior in a multiple (triple or quadruple) way. This AB Tip can be used on Kit Specimen or Ultra Specimen and has got an unlimited power and the elastic rating has no limits too. It is sold with a teflon bush (already assembled) with the 10mm hole size !

A really famous and well known name in the Maver history that now we are using for this super series bolo rod! A vanguard project, limited and ultra quality that we have developed from two years ago together with Reglass engineers. All the patents from the famous bolognese industrial company are now used, plus all the registered and newest technologies that this company is developing on the carbon fibers work. All the technical details, even the most little ones are fixed in the best way as for the performances.... Really unreachable from other bolognese rods! The series is composed by the light version, iper low weight and extremely balanced, ideal for handle light floats till 6 gr and 0,12mm hooklinks; you will simply fall in love with it when you test and handle, feeling the sensation to touch the finest diamond. And the medium version, reinforced and developed in order to be stronger and stiffer, thanks to high resistance carbon fibers, superlative super series built for win the sessions on the rocks and from the harbors, using medium size floats till 10-12 gr and hooklink diameter till 0,16 mm maximum. Stiff and rigid without comparison in the market, very reliable and tested of course also in the fresh waters fighting with big and strong fishes using the correct and related terminal tackles. A powerful and reliable tackle that has got characters and features owned by a real super series! All the Evanon series, in the wrapped versions, is fully guided with Fuji Torzite and fuji reel seat Ns6.

8413B900	05744900	9	9	151	32	457	488	12

The Green Power Evo bolo was for us really a super satisfaction, for us as for all the anglers who have chosen them for their fishing sessions! Now we want to evolve and increase the performances of a project that seem to be already perfect: using the same best quality carbon fibers, we have used newest resins and totally the best technology innovation from the Reglass company in term of impregnation! The result is a super reactive rod and stiffer in the first 3 elements with an high strength force in the whole blank. The perfect bolo for fish in the sea from harbors and rocks but also for the fishing sessions in the freshwater catching big fishes where you need a light weight balanced tackle but really strong and reliable in the meanwhile. A medium action rod but the weight of a light one! It is able to manage floats till 10 grams and hooklinks till 0,16mm diameter. The wrapped version, from Maver company, will fit all the Fuji K guides.

4758B800	05672800	8,00	8	1.40	26	335	375	11

The Superlithium Super Leggera is the top of the new series of 2018. The name is everything! Its big peculiarity is the weight: one of the lowest of the category. This rod permits us to face long fishing sessions, absolutely without tiring the arm, its action is the same of a 'light' rod and it's possible to fish also with thin tips, but if necessary we can use a big tip like the 0.16. during tests of our expert the keyword is reliability! Peculiarity that we can find in all our Bolognese rod .

MADE IN ITALY BY: **reglass**

SUPERLITHIUM

SUPERVELOCE

CODE	RINGED	MT.	PZ.	CLOSED	MM.	GR.	GR.	RING
4756B500	05671500	5,00	5	1.49	19	137	167	8
4756B600	05671600	6,00	6	1.50	22	185	215	9
4756B700	05671700	7,00	7	1.52	25	276	306	10
4756B800	05671800	8,00	8	1.54	28	394	424	11

Salt water is like blood in the veins of this Bolognese rod, the Super Veloce was studied to face very difficult fishing situations where performance and stiffness of the blank are the main features. The Super Veloce was tested at the maximum tests by our technicians and pro-anglers. The most important rod feature is the real stiffness and reactivity. The tip action permit us to fight against big and powerful fishes as seabasses, seabreams and sargos. In fresh water this rod has no fear much less of barbs.

MADE IN ITALY BY: **reglass**

SUPERLITHIUM

SUPERPOTENTE

CODE	RINGED	MT.	PZ.	CLOSED	MM.	GR.	GR.	RING

4751B700	05631700	7,00	7	132	27	390	420	10

The Superlithium range is completed with the brand new "Brutale"; this is a rod that just from the name it express its main features. With this Bolognese you won't have any problem to manage a generous final, with a range of 0.14 - 0.22.

The "Brutale" is designed and built specifically for the fishing of bass with shrimp, as well as in rough waters. In short: a rod for all kind of fishing that require extreme power.

MADE IN ITALY BY: **reglass**

GREEN ARROW

CODE	RINGED	MT.	PZ.	CLOSED	MM.	GR.	GR.	RING
4852B900	05695900	9,00	9	1.53	31	364	404	12
4852B010	05695010	10,00	10	1.54	33	475	520	13
4852B011	05695011	11,00	10	1.54	36	577	622	14

The Green Arrow is a bolognese rod studied for sea fishing from rocks or harbour canals, where in the late years the using of long rods became much usual, just think to the canal of Fiumicino or the river Fiora where normally anglers used to fish with 10-11 mt rods in order to follow the stream with the float in the slowest and most parallel way. The green arrow is a Bolognese rod that we wanted develop for using of tips also very thin like the 0.10 diameter very used in the fishing with maggot, and the use of thin tips is easier thanks the parabolic action of the rods.

MADE IN ITALY BY: **reglass**

SARGUS

CODE	RINGED	MT.	PZ.	CLOSED	MM.	GR.	GR.	RING
4853B900	05696900	9,00	9	1.64	34	490	530	12
4853B010	05696010	10,00	10	1.64	37	660	705	13

The sargus instead of its sister Green arrow has an action much stronger, this peculiarity is necessary for fishing with big baits like shrimp. Thanks its very strong blank we can stop fishes' escape that often try to hide and go into their lair. The range of tips is really big for a rod of this category.

MADE IN ITALY BY: **reglass**

INVINCIBLE EXTREME

CODE	RINGED	MT.	PZ.	CLOSED	MM.	GR.	GR.	RING	LIFT UP

4844B700	05708700	7,00	8	1.34	24	324	365	11	3Kg

Nobody could imagine that we were able to update one of the most representative and famous product from the Maver brand : the Invincible mx bolo! The bolo most sold, strong and versatile has evolved in a hystorical way ! Thanks to the newest Reglass resins and to the most modern technologies we have created the extreme version! Even more reliable, even stronger and super strong! A fantastic tackle for fish in the freshwater also with big lines but also for the seafishing catching big fishes from the boat or from the banks, rocks and harbors! Simply a superlative evolution never seen before! Available from 4 to 7 mt in the blank version or wrapped with titanium guides in order to obtain a light rod but with fantastic, superlative performances speaking about strength!

4717B700	05605700	7	7	125	27	270	329	10

A bolognese rod 'Allround Entry Level' from the company Reglass, with incredible performances and fine characteristics. The project was developed in order to satisfy all the demanding fishermen for fishing in fresh or salt water. The action of this rod is new and called 'Tip Progressive Action': enough rigid and 'still' from third to last element, but at the same time with a progressive action to be sensitive and extremely reactive on the last pieces and on the tip. A rod like no others thanks the Made in Italy that marks its features. The assembling is with rings 'alps' and high quality reel seat. The rapport quality/price is without comparisons.

A bolognese rod developed and born for all the anglers who wants to approach to this fishing style, realized in high modulus carbon fibers, it results ideal for all the waters from the rivers to the trout fishing, passing from the sea fishing sessions. An allround medium version but with parabolic action in order to use also thinner lines, the 4 meter version is really useful in order to be used in the shorter river spots where a long bolo could be problematic. This Bolognese is also tested for catch trouts in the lakes with the float ! Fantastic the relation between price and quality.

A real allround tackle from a stiff action, perfect to be used in the fisheries or from the sea rocks or again in the sea bottoms chasing for every kind of fish; many competitors also tested it in the fast trout fishing sessions. The finest details, as a top level rod, make this bolo a real bomb if we think about this price level and the compromise with its quality!

The name is absolutely famous in the rod range history of the Maver brand: we are speaking about a really wide range of telescopic universal rods super reliable! These ones are studied and developed with high modulus carbon material wrapped in the "crossed formula"... the carbon braid is well visible and is meaning the super power and the maximum reliability. In the different lengths and power (we are in front of 11 different models) the Rocky universal range can be used for every fishing technique: from the lake trout with bombarda or float, through the seafishing from the boat or from harbors and rocks and again for fishing in big natural lakes or, why not, chasing from big catfishes, giant carps or esturgeons using the strongest versions. The lift power for every rod is well printed on each single tackle and is totally real and granted from the production company. Available in the wrapped version or in the blank one, in order to be personalized or also used as telepole, maybe using strong elastics for fight with big fishes near the banks. Finally of course a beautiful range of universal telescopic rods, totally 100% reliable, with beautiful finishings and a superb relation through quality and price.

Is now the best experience from our Tom Pickering who collaborating with Matteo Pirazzini is indicating us how realize and build the best competition feeder fishing rod, a full collection where the quality cannot have any compromise. A super series rod range, made with the best quality carbon and the highest level technologies, never reachable before! Really balanced and super powerful rods, pleasant to use in the shorter lengths and super reliable to cast and force in the longest versions, without lose the balancing, sensitivity and the finest tips created in order to feel the most light bites... in every situation. It takes a lot of months for the Maver team, really busy and continuously in contact with mr Tom in order to realize something that had to be really superb! Top quality guides and ceramic in order to use braid lines without any problem or doubt. Once you will take one of these in your hands, you will feel something incredible, the same sensation that us and Pickering felt once that we have ultimated a similar project.... Such complexas super innovative, without any comparison.

02158004	SUPERLITHIUM CARP	1½	2,2 mm	520 mm

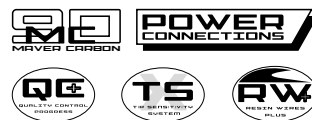

Something really new, from every point of view ! Maximum Japanese carbon fiber grade and module, resined and cooked in autoclave in the most accurate way. Super balanced and slim blanks. The result is an iper balanced range, super pleasant to use in all the competitions and the most technical fishing session. The project can be divided in three big parts and compartments, following the different fishing style and needs: The Carp collection, ideal for who wants to fish in the fisheries using a professional tackle, the Silver fish range dedicated to competitions and technical features and finally the range studied for the long casts when we need to force a lot and so a powerful tackle without renounce to lightness and sensitivity . We have made something beautiful even in the design and in the details: wrapping never seen before, using matt black line and resins that seem to combine themselves with the carbon fibers, top quality guides in order to use braid without problems and black eva and cork combined in the handle part in the most correct way in order to be soft and handy but also really modern and ultra elegant. We are really satisfied about this new and modern project, a range of rods that you ll love as soon as you see and touch them; something that you ll never forget ! An high level collection but for a relation between price and quality quite unreachable in the market.

A short length rod range perfectly developed for fish ad compete in the fisheries: we wanted them absolutely beautiful from technical and structural points , becoming little jewels that we desired to launch as for the competitions as for normal fishing sessions. A perfect tackle for the angler who desire precision, reliability, power and sensitivity in the same moment. The performances are simply the best from the blank to the tips. A perfect curve and action, maximum power and strength chained to extra studied tips developed in order to feel every kind of bite. Magnificent details and relation between price and quality without compromises.

A wonderful feeder rod made with high modulus carbon, with unimaginable performance, both in launch phase than in capture of each species. Developed and built on the needs of the agonists of the entire southern part of Europe, will become a must for hobbyists and feeder lovers who wish to practice their passion with a superlative tool, both in freshwater and sea. It comes in two sections version, with 4 tips all in carbon and 47 cm length (0,5 oz-0,75 oz-1 oz e 1,5 oz), and three sections version, which is equipped with three carbon tips, all in equal length of 55 cm (0,75 oz-1 oz e 1,5 oz). For the Experience Feed with three sections, have been developed 2 glass tips (1 oz e 1,5 oz), which are sold separately to satisfy the needs of the best competitors or who wants to fish in difficult water, in order to receive clearer bite signals by every type of fish. The finishing touches are exceptional, with high quality rings, suitable for the use of braid and a reel seat.

02150002	GLASS TIP	1,5 OZ.
02150003	GLASS TIP	2 OZ.

We are more than happy about the results reached with this project: a feeder rod that is technically suitable as for the fishing in lakes and pounds using methods, banjo leads and feeder cages as for the sessions where the angler is in searching of the big fishes that normally live in the flows or again where we must cast on the opposite side that is often far and difficult to reach (in search of precise casts even in the most difficult days). The tips development is really well treated, offering one carbon tip (2 oz) and two fiber glass tips (1,5 and 1 oz) in order to satisfy each angler. The guides and their character are well selected in order to be really reliable and in relation to can use each kind of braid. If you ll test them you ll remain surprised... starting from the super price!

An amazing tool, made after long months of research and optimization of shapes, materials and all the details that bring us to produce out the "Top Gun". The rod results stiff, reactive, very handfull, a real extension of the fisherman's arm who will hold it. The material Super Ultra Modulus, the resin Nanolith and the MAT 4 are the basis on which the project was made. An incredible rod, in particular for the external reduced diameter in rapport to its stiffness. Only if you try it you will understand the real potential of this fantastic tool.

SINGAPORE 🇸🇬

Many years goes by from the first launch of the series 'Elite Surf' and then every 3 years we developed the series 'Titanium' and then the 'Darkside' one, making innovative steps forwards materials from resins to connections and assembly process. We introduced the new series 'darkside 2.0' with 12 brand new models with the exclusive put-over conical connection. The new fine-tuning material made by Reglass has the logo 'M7' that identify the high modulus at 24.000 filaments with the exclusive 'Ultralight multiwall System 2 High Tensile 760 grade carbon fibre". The new carbon core came from the application of 'black sun core' patent studied and developed into Reglass labs, modifying the molecular structure of the core with a specific impregnating system that increase the mechanical performances of prepreg. The formula 'Super toughened epoxy resins' turns the final product black giving an innovative look. To increase the technical features, we used a system of resins already used into aerospace sector, the 'Super vibrational damping epoxy resin' where the damping of vibrations into composite structures allowed to produce a series of high performance rods.

Reglass is the Italian company that produce the rods Elite Darkside and boasts more than 20 national and international patents and it's on the list of researching labs certified from MIUR (Ministero dell'Università e della Ricerca Italiano). Reglass is constantly studying new solutions in collaboration with C.N.R (Consiglio Nazionale delle Ricerche) and different universities, for having a carbon tissue always perfect and reliable. "we are the one and only Italian company that start from the filament to have the prepreg". The production is 100% made in Italy and it's located in the city of Minerbio (Bologna) in a factory of 5.000 sqm. The products of Reglass are 100% made in Italy and are developed with evolved calculation system and design programs like CAD 3D and FEM. The finishing of the Darkside is complicated and fascinating, all surfaces are the result of the incredible hand ability of our painting's team who use the serigraphy technique, using just only the strictly paint to make the 'artwork' has a graphic that do not make heavier the buttom part of the rod. Every rod is unique because painted by hand. The baking of carbon is into autoclave (process that eliminate the eventual air bubble and these are the principal cause of break). All rods Darkside have the guides Fuji CCKWAG.

FUJI RINGS

"DIFFERENZA CANNE IN 3 SEZIONI"

Fuji KW Color finish frosted silver white (CCKWAG), Ring alconite reinforced aluminum oxide black, Frame stainless steel, Bending strength (3PB) 440, Thermal Conductivity 11, Specific gravity 4.2, Vickers Hardness 13-15, Lighter, Stronger, Greater durability. Double-foot design for casting rods. By adopting tangle free K-Frame, it releases line tangling automatically. Works with everything, Braided and monofilament lines.

TWO TIPS

100gr - 4.65mt:

The lightest rod for ledgering technique in its category, the blank is just 216 grams! This rod was studied for having the maximum sensitivity to advise when we have the smaller bites, furthermore the progressive action of the second piece and the extremely softness of the tip will permit you to manage also big preys with thinner line also the 0.10 mm!

120gr - 4.8mt:

Revolutionary project in the sector of changeable tips, taking the cue from Portuguese and Spanish style we have created a rod able to manage both 50 gr weight for fishing under shore and weights of 120 gr for fishing at long distances not reachable until now by this rod of beach ledgering; you will be amazed by its ballistic features of this light rod. Its length will permit you to use also long rigs for searching fishes in middle waters in deep beaches.

Anelli: Fuji alconite serie CCKWAG con struttura frosted silver white e pietra reinforced alluminium oxide black. Portamulinello Fuji NS Stainless Steel

110gr - 4.45mt:

Super light and sensitive rod that makes you fall in love with thanks its progressive action, gentle both with delicate baits and suspicious fishes. You will be able to cast light rig at good distances without big diameters, having a good rod.

130gr - 4.5mt:

The ambitious project is try to fish at long distances with light rigs (0.30/0.40 mm) without ruining baits, simply doing an above casting. The particular action of the tip permits to manage weights with a big range (it's ideal 70/130 gr). The progressive action helps reeling in and reduce the risk of breaking the superlight end.

140gr - 4.3mt:

You will be amazed by lightness, power and the progressive action of this rod Darkside. You will be able to cast your weights at good distances, without forcing the casting so the bait can arrive intact in the exact point you choose.

160gr - 4.5mt ASIMMETRICA:

We developed other mandrels with new profile, with first piece that is asymmetric longer than the others, so it's possible to have the maximum ballistic performances. The progressive action will permit you to fish at long distances also with no need to do an angular casting, furthermore the full carbon tip will permit t fish also in rough sea..

180gr - 4.3mt:

Fishes on the bottom at long distances is the main target of this rod. This Darkside will amaze you for its relation between lightness and power. With a casting side well-made you'll reach unimaginable distances for a blank of 373 gr. The rod is designed to reach long distances using long drop.

250gr - 4.5mt:

We took the main features the more appreciated ones from the memorable 'Elite Oceano' rod and we put them together with other features of new materials. The result is a rod with unseen performances until today with castings side, you will be surprised by the facility of weight's loading and release of power. The action of the full carbon tip will let you fishing also in extreme conditions.

SPIGOT 110G 4.8M TWO TIPS: Much more than a normal beach ledgering rod, thanks to 2 resistant carbon tips you will have perfect action both for fishing onshore and at medium distance. Moreover its length will let you use also long beams looking for fishes on surface and deep spots.

SPIGOT 130G 4.6M HYBRID TIP: Perfect rod to fish at medium distance also using long beams, and thanks to solid carbon tip you can feel the most sensitive bites. Progressive action helps when you're reeling in big catches, reducing a lot the danger of fishes' escape.

Born from the cooperation between english Maver athletes and Eugenio Ucci, we have put together two "thinking schools" obtaining the most light long casting rod in the world using a blank of just 500 grams of weight !!! The project is so complex that we are able to produce just one rod for each day, but you'll be surprised and amazed by its dynamic reaction made by the extreme conical connection PUT-OVER. The rod can overpass 250 mt on the field, and thanks its strong features and incredible power we'll see it in action at the long casting world championship. The guides are hybrid and designed for use the spinning reel as the casting reel. The rod is also available as blank version for the best personalization of each angler.

M4 PUT-IN 4.1M: This rod's project is so complicated that we are able to produce only one rod per day. Butt section's exclusive inverted conicity needs a lot of working hours to place on all different carbon fibers. The result is a super powerful rod capable to work with very heavy ground and pendular casts at incredible distances in no other possible ways. In the long casting tests it casts until 250 meters, the hybrid texture has been studied for using casting reel and also the normal one, for all customizations and rod building is also available only the blank.

M2 SPIGOT 4.1M TUBULAR TIP: If you were searching for a rod for fishing also in the worst sea' conditions, with a tip can work also against very high waves without the risk to move leads from the correct position, well now you have surely found it! It has been developed to make every kind of cast, even the most technical like the 'pendular' one. Guides are combined in a hybrid way and they have been studied for use both classic reel and the casting one.

M3 SPIGOT 4.1M TUBULAR TIP: It's unbelievable how this very slim rod (21mm) is and what can be able to do. The weight of the blank is only 470 gr. In the long cast testing we have reached an average distance about 200 meters without physical stress and after many many casts; so this rod is perfect in each surfcasting session where you have to cast at maximum distance from the first to last cast. Guides are hybrid in order to use the classic reel and also the casting one.

0483900A - CIMA TUBOLARE OPZIONALE PER JP40 / OPTIONAL TUBULAR TIP

JP30 - 4.3mt:

Very light and extremely potent rod, this is the japan philosophy applied to the surfcasting. Fishing at long distances with thin PE and have the sensitivity of a beach ledgering rod, the only modification applied to this japan tools is a full carbon tip that will permit you to have great catches.

JP35 - 4.3mt:

More power, more distance, without straining body with heavy tool, one of another main and fundamental points of japan technique style. You can choose the classic ogiva of 4.5 ounce in side or in ground, using a thin PE, obtaining incredible distances. Like all Darkside Nage, also this model is available only as a blank, so you can personalize the assembling as you wish.

JP40 - 4.3mt:

We are in front of a three pieces rod more powerful than before, this tool wants a casting technique O.T.G. perfect to be loaded. A lot of our athletes tested it with PE on reel has always passed 200 mt, having good results back. In future we'll see it in action at the japanese champion of Longcasting and we are sure it will have great success.

DARKSIDE HEAVY

MADE IN ITALY BY: **REG/ASS**

CODE	RINGED	MT.	PZ	CLOSED	MM.	GR	GR	RING
4846B002	05706002	4.65	3	1.54	20	217	288	15
4846B001	05706001	4.80	3	1.70	20	276	340	14

DARKSIDE HEAVY 4.65 MT:

Darkside heavy 4.65 mt is even slimmer and lighter than the « syster » of 4,8 mt and is created for fish and compete with bolentino in the deeper situations but also for the light drifting and again for the medium and heavy bolentino technique. We wanted to build up a unique tackle, not existing on the current market, really light, slim but in the meanwhile super powerful and its semiparabolic action, softer than 480 model, permits to fight in the best way against the violent movements of the big seabreams, saragos and similar very strong and big fishes, decreasing in the best way the hooklinks breakages and permitting to land all the fishes without unhook them ! The rod is perfect for bolentino fishing under the boat but also for compete on the bottom, able to cast from the downside even 150 gr and also to handle 200 gr when you are fishing on the bottom.

DARKSIDE HEAVY 4.80 MT:

This 4.8 mt model is really a super stiff action rod. Without any doubt is able to handle 400 gr lead fishing on the bottom but of course is even ideal for cast from downside over 250 gr. We wanted to build a slim and light blank, perfect for fish and compete in the deepest sea as Portugal, Spain, Netherland and England. Some anglers tested it in the best way even with the light drifting, searching big groupers with live baits. Balanced in a perfect way, super light if compared to the super powerful character.

TELE

TWO
TIPS

DARKSIDE HEAVY

MADE IN ITALY BY: **REG/ASS**

CODE	RINGED	MT.	PZ	CLOSED	MM.	GR	GR	RING	BLOCK
4718B006	05606006	4.00	4	1.38	20	207	257	10	1
4718B005	05606005	5.00	6	1.40	23	290	369	12	1

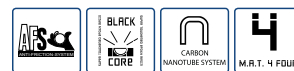

DARKSIDE HEAVY BOAT 4.00 MT: This rod is the top for anglers of the fishing boat sector. Anglers choose this model because of its features of reliability, sensitivity and they can do great casting below. Resistant and light rod that will surprise you! We can fish in a good way with all weights also thanks to the two tips are unchangeable.

DARKSIDE HEAVY BOAT 5.00 MT:

The 5 mt telescopic darkside boat has got parabolic action and is able for sure to manage 200 gr lead and of course ideal for cast from downside some leads from 80 to 140 gr. Superbe lightness and balancing power is of course a medium power action and is of course an allround tackle, created for be used in a lot of fishing conditions : during a bolentino competition you can for sure change hooklinks, lines and leads using the same rod because is a real super allround ! Perfect for the light drifting searching for little tunas, ideal for the competition catching mackerels, seabreams and parago. The soft parabolic action is wanted and built for permit us to land all the fishes decreasing the possibilities to unhook them or to break the line. Bad possibilities that are higher and higher using a stiff, tip action rod.

TELE

DARKSIDE BOAT

CODE	RINGED	MT.	PZ	CLOSED	MM.	GR	GR	RING
4718B001	05606001	3.0	4	1,39	17	94	147	8
4718B002	05606002	3.5	4	1,49	18	120	185	9
4718B003	05606003	4.0	4	1,54	19	151	228	10
4718B004	05606004	4.5	4	1,60	20	171	260	11

DARKSIDE BOAT 3 MT: Light but at the same time very resistant. This great tool combines the ease of a rod with telescopic blank to the sensitiveness of the tip (2 gears) connection with tied rings. It's perfect to do the bolentino fishing near the shore or in medium depths. This tool has a real fine handle and is ideal for fishing all the species that can damage the bolentino fishing. A great rod for who wants to fish with thin lines and count on the maximum sensitiveness.

DARKSIDE BOAT 3,5 MT: Three meters and half of technology! It was designed by the Italian company Reglass using the exclusive Nanolith patent, it's Ideal for bolentino fishing, medium and light drifting. The distinct qualities of the Nanolith permitted to design a tool like this, though and created for the 'hobby' fishing but getting back the characteristics of Mever rods Darkside Boat (longer) used from champions in national and international competitions. The blank is very very light and the connection tips allow to see also the those fish bites that with other rods could be impossible to see.

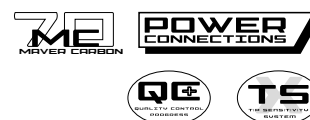

DARKSIDE BOAT 4 MT: The type is the classic one of 'bolentino' made in Italy but the quality of the tool makes the difference! The strikes are always clear. The four meters measure is also right for who has a small boat and doesn't want a rod too long. Rod very technical, this is the right choice for fishing mackerels, jack mackerels and bonitos too in the light drifting.

DARKSIDE BOAT 4,5 MT: Thanks to the two connection tips, this rod is perfect for technical fisherman so for who likes a light rod with strong tip's action. The length 4,5 mt makes this Darkside Boat ideal also for the competition use but it's in the daily fishing that proves all its versatility, combined to different species and sizes preys. The characteristics of the blank makes It good also to face bonitos, the most fighting preys that you can fish in half water using the whole sardine.

Light, strong and durable, a telescopic rod ideal for many types of fishing from the boat, but especially for the light drifting, thanks to the parabolic action but powerful at the same time. The rings allows always the fluid sliding of nylon or braid. Excellent with the casting reel for the light drifting for the white fish. The two interchangeable tips allows to adapt this versatile tool to the fishing action that we prefer.

05712270	2,70	2	142	21	386	10	100/200

A superlative relation between price and quality for this medium-heavy boletino rod range: really powerful ones but in the meanwhile so sensitive in order to feel all the minimum bites thanks to the solid tip. Double arm guides wrapped in the best way and reinforced screw reel case.

2 SECTION PUT IN

COMMERCIAL SERIES
MV-R SQUID

CODE	MT.	PZ.	MM.	CLOSED	GR	RING	C.W.
05730180	1.80	2	13	94	138	10	30-150
05730210	2.10	2	16	112	166	10	30-150
05730240	2.40	2	17	127	215	10	30-150
05730270	2.70	2	18	144	247	10	30-150

A complete series of lengths, It's ideal as for eging style in search of cuttlefishes, flying squids and squids, as for the bolentino fishing style. Progressive blank and very sensitive tip are avoiding every possible unhook of the catches. The finishing in "soft touch" EVA material makes fishing much more pleasant.

2 SECTION PUT OVER

DRAGON SQUID

CODE	MT.	PZ.	MM.	CLOSED	GR	RING
05614210	2,10	2	9	1,05	110	9
05614240	2,40	2	10	1,20	118	10

The Dragon can be used for the squid fishing or fishing line. The particular arrangement of the rings increases the sensibility of prey bites and prevents the wire twisting on the tip, in the launch fase. The first piece is made in carbon high module to increase the rigidity, while the tip is made in high resistance carbon, with the final part in full carbon.

NEW

ITAKA EGI

CODE	MT.	PZ	CLOSED	MM.	GR.	RING
05713180	1,80	2	96	8	121	8

Eging rods with very high quality finishings, created for fish squids and cattfishes, as from the boat as from the bank. High quality guides that permit us to fish with the braid without the possibility to tangle during the cast and with zero possibility to damage the same guides. Super progressive action that helps to reel the fish decreasing the possibilities to unhook them.

2 SECTION PUT IN

EMPIRE EGI

CODE	MT.	PZ	CLOSED	MM.	GR	RING	C.W MAX
05686180	1.80	2	94	14	151	10	30-150
05686220	2.20	2	111	15	187	10	30-150

This rod was designed for fishing with totanare to hunt cuttlefishes, squids and totani having the sensitivity of the tip and blank. The progressive action avoids to lose the prey during reel in phase. The rod can be used also for bolentino light fishing.

SAMIRA SQUID

CODE	MT.	PZ	CLOSED	MM.	GR	RING	C.W MAX
05708180	1,80	2	1,00	12	130	10	30/150
05708210	2,10	2	1,09	15	150	10	30/150
05708240	2,40	2	1,25	16	170	10	30/150

Three rods for fishing from the boat in all the techniques. Created to help the anglers who normally get through the bolentino and totanare techniques. Really a good position for all the guides that help the fight with all catches and that do not permit the wrapping of the monofilament on the tip (especially during the cast). Incredible the rapport between price and quality and also the sensitivity of the same tip. The handle part is made in beautiful Eva material.

COMMERCIAL SERIES
MV-R TURNER

CODE	FT.	PZ	CLOSED	MM.	GR.	RING	LBS
05740001	6'6"	1	200	12	352	10	6

Specific rod for the Trout Area and "spinning ultralight", thanks to the tip made of solid carbon, you'll have the maximum sensitivity on the lures movements and prey eating. You will be surprised by the lightness, balance, accuracy of the launch and sensitivity, for a tool with a small cost. Don't be fooled by the slim blank which is still able to fight even large prey.

The Smart SLR monofilament is the Maver nylon most sold worldwide in order to realize competition hooklinks and we are now really sure that the new slr fluorocarbon will have the same success, and maybe more, on the market and through the anglers. The Japanese technicians and engineers were able to offer us this fluorocarbon that is presenting the same characters of our Slr nylon, adding the performances of the best quality fluorocarbon. Its softness, knot resistance, reliability, invisibility and abrasion resistance represent the first and most important characters that are making this fluorocarbon totally unique in the worldwide market.

100% Fluorocarbon realized for hooklinks and dedicated to the big fishes in lakes and seawater. Very low grade of light-refraction underwater...it's invisible for the eyes of the fishes. Very high and real tension test, abrasion and salt resistance. Special treatment for the UV rays. It has more impermeability than a normal nylon monofilament. Also ideal for realize surfcasting arms.

Elite Fluoro line is a very high quality product. Perfect for making rigs, having a low degree of light refraction in the water. High break loading, high resistance and tenacity to abrasion and saltiness. Treated to be UV proof. 100% fluorocarbon. The lines are electronically checked to ensure the highest quality. The Elite fluoro can be used to make ultra light main rigs.

H.L. Hook Length, is the caption that describes this fluorocoated, transparent rig with features that are very close to the invisibility of fluorocarbon but with a higher ultimate strength, very similar to that of a nylon. The abrasion strength which is about twenty times higher than that of last generation nylons. The fluorine coating makes the line waterproof and keeps the resistance unaltered also when used for several hours.

The monofilament 619, specifically studied for the realization of the mainline for the poles. Superlative strength, resistance on the knots without limits, abrasion resistance and also resistance for the slides of the little leads on the same lines. These are the best characters of this monofilament, selected in Japan after many and important tests. The superficial treatment gives to this line a great resistant force that maintains the mechanic characteristics till the 95% also after 10 hours of water immersion.

 BLACK/GREEN
MADE IN JAPAN SPOOLED IN ITALY

Thanks to the fusion of two different japanese nylon polymers, we have increased a lot the following characters:

- **WATERPROOF:** one of the first causes of the nylon breakages during its use, is definitely the water absorption. During the creation of our Dynasty Green line we have increased a lot the waterproof power, increasing also in this way the breaking strength of the same monofilament while it is wet inside the same water.
- **ELASTICITY:** One of the most important character in order to fight in the best way the quickest runs of our catches, being able in the meanwhile to return in the original molecular structure avoiding the damage of the same line polymers.
- **FLEXIBILITY:** An important quality for the monofilament especially during the cast moment and for the creation of the most technical knots.
- **ABRASION RESISTANCE:** The particular molecules that are the base of these polymers make it really resistant against the abrasion and again the special superficial siliconing make the same monofilament unassailable by the saltwater.
- **ANTI UV:** All the monofilament in the market bring the packaging written "anti-uv power" but is never specified on them the grade of resistance. Thanks to the newest solvent we were able to reach the 100% resistance against the uv rays.
- **COMPLETELY SINKING:** The sinking power of this line is superlative and this character permit us to use the same one for all the techniques where we definitely need the best sinking line.
- **100% MIMETIC:** The particular colors of the 2 polymers make the same line really mimetic and camouflage for a lot of waters and bottoms.

Very good line for every fishing style where the cast is the basis for a catching. Great smoothness among the rings, low coefficient under stress. Very good for Carp Fishing and Feeder.

ZERO CONIC

1 CF. / 6 PZ.

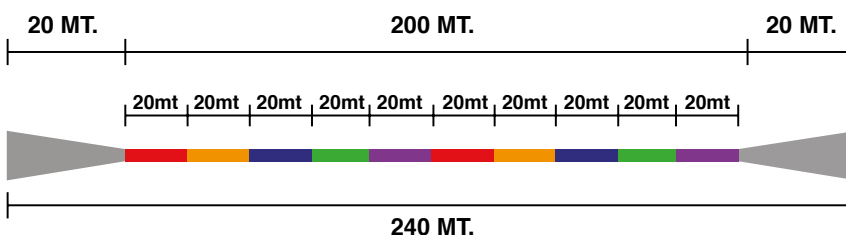

MULTICOLOR

MADE IN JAPAN SPOOLED IN JAPAN

The line Zero Conic is multicolor and has conic shape, it's 240 meters long with two shock leaders: if there's a break during the fishing session, you can turn opposite and use it again without buying a new spool. The shock leaders measure are 20 meters and all transparent colors, while the other 200 meters monofilament have 5 colours section interchanging every 20 meters. Thanks to the low extension you will have good performances in respect of the multifibres, without losing that important but controlled elasticity that avoid to unhook the fishes!

Thanks to the low elongation power, this monofilament will permit you to reach similar performances to the braids used for shock leaders. The force that we accumulate during the casting moment will not decrease for the elasticity of the nylon, but it will be transmitted to the lead without making the "spring effect" that is the first cause of short casts and loss of power. Every piece is 15 mt long and can be cut as in the thinner part as in the bigger one in order to reach the needed diameters or the most desired ones.

ELITE SHOCK LEADER

Sections of transparent conic line to make shock leader. Double anti-abrasion layer for a better duration, very high knot hold and incredible resistance. Made in Japan with very high quality standards. Its transparent colour makes it suitable for daytime fishing in clear water when the fish gets very suspicious. Every section is 15 metres long and can be cut at the desired length to obtain the diameter wanted.

■ NEUTRAL COLOR

MADE IN EUROPE SPOOLED IN ITALY

The national athlete Eugenio Ucci has selected an European production monofilament that is really good to make hook-links, beams and shockleaders. The mix of polymers that are used and the new kind of extrusion called "smooth surface" make it really perfect for glue the little beads in order to create beams. It is spooled in large coils in order to not stress the line; in this way the same line will rest unchanged from the spooling time to the final use by the angler. It has a very high knot strength and fantastic properties against the casting stress. The elasticity is controlled and the rote (mechanic memory) is absent: all these together with the maximum transparency, are the best characters of this super new monofilament!

If you look for a line with a "real" amazing resistance both to abrasion and traction, the G3 will fully satisfy your needs. Compared to a traditional nylon it has an antisaltiness resistance which is twenty times higher and it keeps its features unaltered also when used at high or low temperatures. It is also ideal for fishing close to rocks or rubbles that tend to easily eat or cut a common nylon. Another important feature is the low extension which allows a direct contact with the bait and the prey also when fishing at long distances, besides the torsion of the line retrieved under a strong traction is minimized thanks to the controlled mechanic memory. Finally the UV rays proof treatment makes Smart G3 last longer.

BLUE POWER

Incredible relation quality/price: try to see price for each meter!!! (ex. 0.168 mm 4.300 mt). the line Blue Power has been designed for those fishing technique in salt and fresh waters, expecting to fill many different reels (ex. competitions for trout lake) or the line to be changed often (ex. surfcasting competitions). This line is able to support high stress like catching one hundred fishes in just one match, without losing the breaking strenght. The progressive stretching allows perfect strikes without losing tension between fish and rod in order to avoid unhooking and to be able to increase the percentage of the catches "on the bank"

EVY

European monofilament with excellent rapport between price and quality is ideal for all the fishing techniques in the sea and freshwater. It's realized for the reels. Ideal for the beginners they want a good quality monophi-lament.

Japanese monophi-lament with excellent rapport between price and quality is ideal for all the fishing technics in the sea as in freshwater. It's created for the reels. Ideal for the beginners they want a good quality monophi-lament.

ZERO HF FLUORINE

Taking advantage of the extraordinary features of fluorocarbon when using it on the reel is difficult but, thanks to fluorocoated zero HF, we can spool the reels obtaining the right mix between the features of a nylon and a fluorocarbon. This line has similar invisibility features to those of fluorocarbon but with a higher ultimate strength. The most innovative feature is the abrasion strength about twenty times higher than that of last generation nylon; today we can even cut plastic with zero HF. The fluorine makes the surface much smoother than that of traditional lines, an important feature when the cast is a fundamental part of our fishing typology, besides, the coating makes the line waterproof and keeps the resistance unaltered also when used for several hours. Finally the surface fluorine layer makes the zero HF UV rays proof.

00920238	00919238	0,238	6,1	12

line TT Ice is the natural evolution of our best seller line 'Smart TT', thanks to the extrusion where 50% is Nylon and 50% is fluorocarbon, we succeeded to have the best line ever made for a reel. The percentage in nylon material guarantees a great grip to the knot and the percentage in fluorocarbon material makes the endurance to the deterioration grow; further the line will remain unchanged even if used in temperature under 0° (like -20°C). Low stretching allows good strikes directly to the fish in a very short time. Standard 100% nylon lines absorb water and lose almost 15% of breaking strength ! On the other hand the TT Ice is completely waterproof and its features remain unchanged also after a lot of hours of fishing or after thousands of casts.

TT RED FLUORINE

	00909030	0,300	10,30	20,5

The "Smart TT" is our most appreciated line from all the fishermen's world and we are sure that in this version it will become soon a best seller. The new mixture made the TT colour red like fire and the fluorine cover increased the strength to the abrasion up to twenty times more compared with the previous nylon's generation. The fluorine makes the line's surface much more smooth than the standard ones, this is an important feature when the casting is a fundamental part of our kind of fishing, also the smoothness makes the line waterproof and keeps the features of endurance even if used for a lot of hours. You will be impressed by his strength and endurance!

SMART 4K

1 CF. / 3 PZ.

ORANGE FLUO COLOR

MADE IN JAPAN SPOOLED IN ITALY

CODE 300MT	MM	KG	FISH TEST KG
00907017	0,17	3,1	6

 LIGHT GREEN

After month of research and study in the field of materials and related yarns useful for the braid fishing construction, we have developed this wonderful sinking braid with high resistance to nodes and abrasion.

A tested braid for disciplines like spinning, surfcasting, feeder and "bolentino" that we decided to propose starting from real measurement of 0.05mm until 0.19mm. In relation to some diameters it was enough for us to weave (thanks to innovative technology) 3 lines, mixed in dyneema and polyester, for others we opted for the use of 4 lines, mixed between dyneema and polyester. We are so pleased to have crowned the range of Smart in a product with this quality and affordable price.

DUAL BAND BRAID

00740021	0,21	16,3	33

 BLACK / GREY

It was not easy at all develop a braid that could have the same quality of our Dual Band Monofilament, but the operation has finally succeeded and we can say: "mission completed". The same braid, reflects the colour of Dual Band, the efficient sinking power and the unique "total anti-abrasion" feature, in addition to the perfect seal at each type of nodes. To achieve some targets we have to work and braids 8 lines with particular and innovative materials with a sensation of silk at touch. We wanted to create something really different from what the market offers today and after so many test and hard work, we are sure to hit the target. We tested it in all fishing disciplines that needing the use of braid and you can truly trust of our positive response. Another satisfaction is the diameters that goes from 0.02mm to 0.21mm. Value for money is incomparable. Ideal as a shock leader in surfcasting.

The Elite Luminex was created thanks to the new nanotechnologies that enable to englobe the fotoluminescent "Glow" solution inside the nylon. The thread lights up in the dark after "recharging" itself with a light source. Several advantages:

1. A lot of species are attracted by fotoluminescence, which is "food" in nature.
2. It can be used in daytime too, when fishing beyond a certain depth, as the darkness activates the luminescence.
3. Its peculiar formula makes it suitable both for making beach legering and bolentino main rigs and for the making of rigs or bite-proof reinforcement (bagues etc...).
4. Particularly suitable for catching cuttlefish, squids and ink-fish.

NEMBO REEL

The polymers and the special technology used, make it highly resistant to the sliding of the rings and abrasions. The lines are electronically checked to ensure the highest quality. Its transparent colouration makes it suitable for fishing in daytime in clear water when the fish gets very suspicious. Incredibly light and soft, features that drastically reduce the friction among the rings in the cast phase.

KATANA

The Katana line was created to satisfy the most demanding fisherman, with a Japan steel hooks range of top quality enriched with carbon 110, selected in the more suitable series for specific uses. Carbon and steel alloys used are of the highest quality. The tips sharpened in chemical baths have a double durability compared to standard hooks. The Katana Hooks Collection was developed by Maver technicians in collaboration with the best Japan factories with the common goal of achieving top performance. The katana series combines all the Maver best seller in one, both for the freshwater and the seawater.

FRESH WATER:

The 1090 is the world's biggest selling Maver hook. Nickel hook, large curvature, very light but durable at the same time, the chemically sharpened tip ensures a perfect priming of our bait, worms and delicate ver de vase. Suitable for crucian carp, carp and breams both for the roubasienne fishing and English fishing. In sizes from 2 to 8 has long been the leading hook for trout fishing both in lake that in torrent. The blued version, the 1091, is ideal for fishing in waters with live bait. The black nickel version hook is for fishing in canals where bremes and carassio are, this particular treatment of this hook makes it much more reliable and performant that becoming perfect for waggler fishing or medium size fishes.

SEA:

The 1095 in the large sizes is ideal for the priming of the live shrimp for the fishing of sea bass, but also for the priming of the sardine in the light drifting in mackerel and horse mackerel. In the small sizes it's perfect for the worm priming.

Straight hook with micro-loop, medium line, dark grey. It can be used during competitions or in carpodrome, where security, endurance and reliability is required. The micro-loop permits to use very thin lines and to avoid cut near the palette.

KATANA MATCH HOOKS

KM

*CF. / 10 B.

The Katana Match are an high quality hook family made in Japan. Every hook is directed to a specific use, each series is characterized by a colour and an indication (for example: TOP CASTER, WINTER LAKE, etc.) so that you have an extremely focused and performant product for any situation. The material used are of the highest quality, quality that distinguishes the entire Katana series.

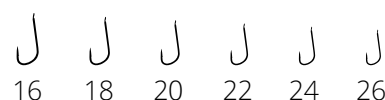

KM01 SPECIAL BLOODWORM

MADE IN JAPAN

CODE	SIZE	PZ
KM01A016	16	15
KM01A018	18	15
KM01A020	20	15
KM01A022	22	15
KM01A024	24	15
KM01A026	26	15

This hook is particularly light and thin, very good to be used with vers de vase. The chemically sharpened point enables not to spoil the bait so to have the best presentation. The medium opening and the length of the point provide a very good catch of big preys too.

KM02 FINESSE

MADE IN JAPAN

CODE	SIZE	PZ
KM02A018	18	15
KM02A020	20	15
KM02A022	22	15
KM02A024	24	15

With the above one, this range is designed for the finest fishing, for the bait of a single vers de vase or a tiny worm, searching for small fish or breams or gardons. Classic shape with medium-long shank and narrow curve for a stronger hold. Very good for search fishing bleaks too.

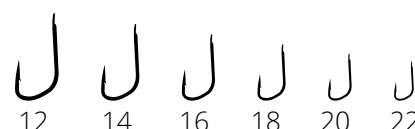

KM05 TOP MAGGOTS

MADE IN JAPAN

*HOT PRICE

This hook is similar to KM7 but of bronze colour. Perfect for the bait of caster or caste-rone, hemsps and worms. The bronze colour helps the hook to camouflage perfectly inside the caster for difficult fishing conditions.

KATANA TROUT

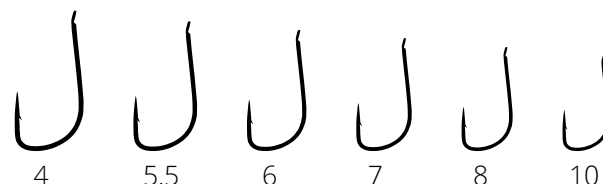

KT01 SUPER TROUT

MADE IN JAPAN

CODE	SIZE	PZ
KT01A004	4	15
KT01A055	5.5	15
KT01A006	6	15
KT01A007	7	15
KT01A008	8	15
KT01A010	10	15

Exceptional hook, especially conceived for trout fishing. The perfect ratio between the length of shank and point and its opening makes it very effective in the hooking.. The line diameter is rather thin compared to the hook size and this guarantees a perfect bait of the most delicate baits. Very resistant thanks to the highest quality steel 110 but still very light.

KS

*CF. / 10 B.

If you're looking for the best Japan hook for the sea fishing, you found it! All the hooks of Katana sea series, have the anticorrosion treatment with a special glossy black finish that makes our hook unassailable by salt and corrosion caused by the rubbing on the seabed or on the rocks. Each model is designed to catch specific prey and the curvature of the hook is designed for a better and natural presentation of the bait. The chemically sharpened tip with a patented acid bath, allow to catch many preys without losing sharpness, essential features for the anglers who fish in speed.

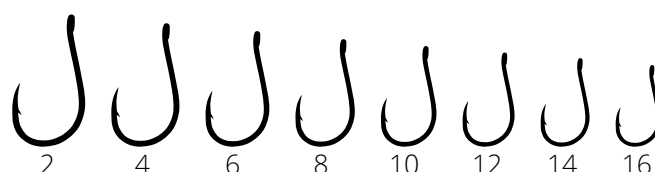

KS01 SPECIAL CRAB

809MDA10	6+1	4.6:1	18 KG	0,40/400	530

A superlative casting machine built for surfcasting, carp fishing and boat fishing. Double oscillation wired spires spooling system that permits a perfect monofilament line on the spool in order to obtain longer casts and zero memory! Anti-twist and anti-corrosion line roller that avoids the monofilament and braid torsion, permitting to maintain their quality for a long time. Over sized discs in order to fix the line tension during the casting moment, also using heavy leads. Tested from over one year from all our sea anglers and best competitors, the result is a pure comparison with the highest quality and highest price reels, exalting its reliability. Its force point is for sure the stainless steel bearings, fully covered, that are increasing the fluidity even after many years of casts and use. It is sold with 2 spools: an aluminium deep one and the other one, shallow, in teflon material.

SPOOL REEL

TEFLON

ALLUMINIUM

Thanks to the thicknesses, the spools 'darkside Universal' can be assembled on the biggest part of the 10.000 size reels on the market: . The aluminium spool has big capacity and the Teflon spool has an ideal match profile for castings at long distance. Both spools has multiple-disk friction "drag power" 18 kg.

MV-R 5.000

CODE	BEARING	RATIO	DRAG	MM/MT	GR
809MDA50	6+1	4.7:1	18 KG	0,20/290	430

From many time our surfcasting, feeder, carpfishing and boat fishing anglers were asking us a 7000 size spool but fitting on a low weight size 5000 reel: now it is totally possible. The newest MV-R5000 is an ultra weight machine with over sized spool in order to cast longer compared with similar size reels. The super compact body is avoiding problems and movements in the mechanical parts and thanks to the stainless steel covered ball bearings we will reel all the fish in the most clear and fluid way. The anti-twist and anti-corrosion line roller is developed as for the nylon as for the braid and is fully decreasing the damages of the same materials caused by the casts, the usage and the various torsions. The new spooling oscillation system permits the perfect line spooling, avoiding memory effect during the casts. The micro metric drag will also permit the perfect calibration on the breaking strength point of your monofilaments.

809MMVR4	5+1	5.2:1	18 KG	0,20/150	300

Designed for the rigours of today's match angler, these eye catching reels are perfect for feeder or float work. Packed full of features offering a level of performance that allows you to feel more connected to the fish. With a graphite body and rotor, both the 3000 & 4000 series are lightweight, yet have powerful gearing and boasts a total 5 + 1 ball bearings for a silky smooth performance. Loads of cranking power makes these reels ideal for distance feeder work or casting big wagglers on large rivers / lakes.

FEATURES:

- INSTANT ANTI-REVERSE BEARING
- LIGHTWEIGHT DESIGN
- COMPUTER BALANCE ROTOR
- ANTI-TWIST LINE ROLLER
- AMBIDEXTROUS
- MULTI-DISC DRAG (WATERPROOF)
- ANODISED SPOOL
- INTELLIGENT OSCILLATING SYSTEM (IOS)

The vulcan reels are excelent machines with large spools, realized thanks to high end quality bearings and technology. The first character is for sure the fluidity and the line spooling: simply finest for this category reels! The renforced graphite body closed inside a mechanical technology supported with high quality sphere ball bearings plus a rotor based on a big bearing that has got rollers with infinite anti-reverse system. The spooling system is totally based on S-curve system, ideal with the big and very open spools. The ultra sized spool permits the best casts and decreases the memory effect on the monofilament. The electronical balance system of the rotor permits the most fluid and nice use , cancelling the possible vibrations and possible defections.

CARBO BREME

MADE IN ITALY

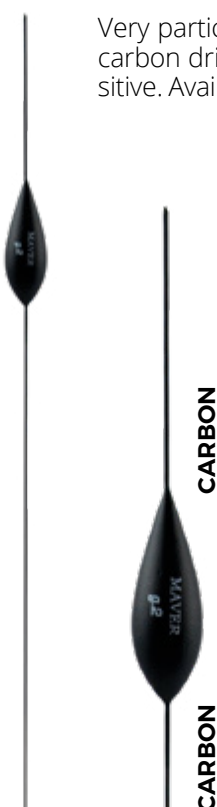

Carried away on a success wave of the whole Carbo series that we have decided to complete this year with another range really technical, ideal to see the typical bream bite from the bottom to the upside, thanks to the particular bulb mold. Of course for the Carbo Breme float we have used carbon antenna and carbon drift plus a total black design! As all the others competitions floats, we are using ultra quality balsa and thin painting that doesn't modify the float's capacity, the floating power (perfectly balanced) and its own structure!

AKIRA

MADE IN ITALY

Is simply the typical fishery float but it can be used even in natural big lakes: the long carbon drift makes it perfect and really stable and sensitive but its biggest feature is the little ball placed in the middle of the same antenna, a little bit below from the empty part that is used as super stabilizer. Thanks to this super news, we can move it several times out of the water in a perfect vertical way, making a super natural movement of the bait when it is coming back on the bottom. We can win the most suspicious fishes especially in winter or in the sessions where they are more difficult or invite ant to catch.

MALENA

MADE IN ITALY

This model is ideal for the most difficult winter fishing in lakes, where it's often to succeed and for having some catches it's necessary a lot of line' meters. The carbon fibre insert allows us to lower slowly our bait towards the bottom and the the big hollow aerial permits us to adjust the float weight and to calibrate the same float in the most perfect way and in the meanwhile to be able the see it in a perfect way. The particular shape of the top part makes this float an excellent solution for windy days.

NITINOL:

In first preview Maver introduces a revolutionary news into floats world, the Nitinol. The Nitinol is a composite material made by nickel and titanium giving to nitinol a completely resistance to every kind of twisting we have during our fishing sessions, this resistance is guaranteed because this material is classified as super elastic. This feature concerns the metal's capacity of recovering the original shape, also if deformed before, applying an opportune effort. The stem in Nitinol guarantees all advantages of steel stems cancelling all negative aspects. This material will be for sure very used in future Maver series.

RAMBO

MADE IN EUROPE

Thanks to this material we have create the Rambo, a float that works as if it had a metal steam. Hollow plastic antenna, that is very visible, and a hole with excellent design, makes this float a real all-around.

UFO SERIES:

New floats series designed for the carpodrome fishing, the UFO series encloses all the best quality for a float for heavy fishing like carpodrome, in summer. The special external painting, gives an elegant look and guarantee an excellent sturdiness to the body. The empty antenna guarantees an excellent night visibility and allows the use of baits like corn and large sizes pellet. Inner line, glass fiber drift and spiral steel eyelet. The new UFO CARP series is designed for the roubasienne fishing on long distances or in that lakes where we have a great deepness. The UFO MARGIN and UFO GALLA series, were designed for the fishing under the shore where the deepness is reduced and a short float can fish flawlessly.

UFO CARP 1 MADE IN EUROPE

Tapered body, empty high visibility antenna, inner line, spiral eyelet make the Ufo Carp 1 the most suitable rod for roubasienne fishing in carpodrome from 6 to 13mt.

MVR SERIES:

After years of success of our Zero-cell series we have decided to renew the catalogue with new shapes and a roachell more performant. The series MVR will become a must for fishing in carpodromes during the summer. We have used high quality roachell, more fast than before. The vertical cut of the body is synonymous of beauty and strength, the double aluminium ring and the empty bristle reinforced make the MVR series perfect. The roachell is a material with closed cells so it can't 'drink' in no ways, keeping unchanged the calibrate also after some damages.

"PRESENTAZIONE GALLEGGIANTI MV-R"

GHOST SEAT BOX GREEN

NEW

MADE IN ITALY

CODE	MODEL
777PC000	COMPLETO MV-R GREEN GHOST
777P0000	MV-R GREEN GHOST SEAT BOX
800A0003	UMBRELLA ARM
800A0007	CROSS ARM 90°
01906010	MEDIUM SIDE TRAY 52x38 CM

The MV-R GHOST seatbox is presenting itself as the top quality for the 2020 season. It will be sold in 2 colors: black and green ! This perfect high-end seatbox is absolutely and totally new , presenting main innovations under technical and structural points ! In order to realize the main frame is used the last generation aluminium material , ultralight and called AV7000 THAT IS PERMITTING US to have and launch an ultralight box of 14,2 kg only! The 4 patented leg system is now composed by 36 mm fixed legs and for each one of these we have just one regulation knob that is used for fix and regulate the internal telescopic 30 mm part in order to select the height of our box and frame ! In this way we can also drop down our frame to even 1 cm from the ground!!! The frame is built in order to have the seat moved forward than the classic position obtaining in this way a better baricenter position and a total, absolute stability of the whole box! The newest gel foam seat is resulting totally comfortable also after many hours of fishing !

SIGNATURE SEAT BOX D36

CODE	MODEL
800P0013	SEAT BOX SIGNATURE D36

The classy Signature D36 seat box, with features that will make it a 'must have' for the Maver following. It's super sturdy construction and specification ensure that it's not just practical but hugely adaptable. The deluxe embroidered pole seat adds style and comfort, with spirit levels on two of the 36mm legs for perfect stable positioning every little detail has been accounted for to enhance your fishing experience. The addition of six telescopic anodised legs combined with the sliding industrial strength, anti-slip footplate and lock & slide hinge system makes the Signature D36 the ultimate modular seat box.

- 30mm Winder tray - 40mm Tray attached to main frame - 30mm Stacking module & lid - Compression leg retaining blocks - Large swivel mud feet - Heavily padded, branded shoulder strap - 2 x Single cross drawer unit with dividers
- Ergonomically designed easy grip hand wheels - Anti-memory, seat cushion with embroidered logos - 6 x round 36mm telescopic, anodised legs - 2 x Legs with fitted spirit levels - 2 x Legs fitted with threads to accommodate accessories
- Free flow, industrial strength, anti-slip folding footplate - State of the art lock & slide hinge system, allowing access to the box from the front and back.

800A0003	UMBRELLA ARM
800A0008	RIPPLE ARM 90 SHORT
800A0011	SIGNATURE SIMPLE ROOST

A stunning new MV-R Z frame seat box from Maver. Made from aircraft-grade aluminium, the stylish Z-frame design is not only aesthetically pleasing, but also saves on weight. Incorporating a European-patented 4-leg system. Featuring 30mm round telescopic legs, the box is a three-drawer model with two front drawers and single cross drawer. Complete with a 40mm ABS stacking module and lid. Additional modular units are also available. Boasting a free flow industrial strength sliding cassette, two spirit levels and fully adjustable mud feet, the seating position can be set precisely on all terrains. Finished off in an understated, but classy matt black finish with tasteful Maver livery.

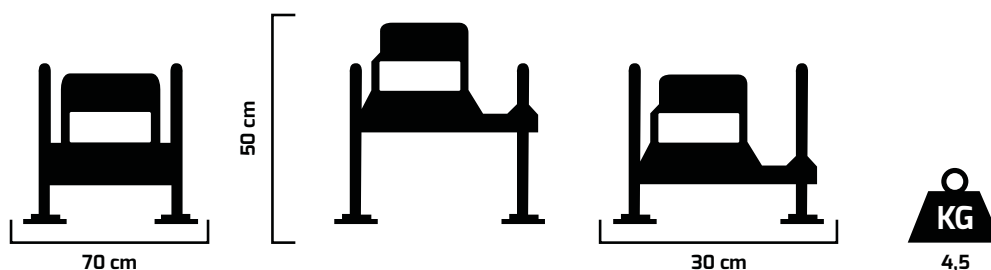

4X4 SEAT BOX

CODE	MODEL
800P0012	4X4 SEAT BOX

This Seatbox Is very practical and light weight. Perfect for fish from harbors but also from lake's banks with bolognese rods or poles. Four legs of 30 mm making it very stable and the plastic legs grant a very good grip on every kind of field. The very comfortable sit helps long fishing sessions and the pvc compartment under the seat allows us to put all our needed accessories in a very practical way, protecting them from the weather like humidity, rain or salt too. its lightness allows and help you to pick it up and move it throw different spots. A real allround tackle for every kind of need!

Signature

The Signature accessories range is the natural completion of the Maver seatboxes range. The new connection block that is developed together with Maver UK assures the best connection for each accessory to our seatbox. This new one, permits to be set on 30mm Maver leg but also to adapt all our Signature accessories on 25 and 36 mm legs: you have only to substitute the interchangeable bush. rapport price/quality. Very notable is the system that doesn't permit the bush to exit accidentally from its seat ,during the rotation and during the assembly or the disassembly as well.

ALL SIGNATURE ACCESSORIES ARE DESIGNED TO FIT 25 MM, 30MM & 36MM LEG SYSTEMS.

We have simply asked to our Tommy Pickering to help us to develop, test and confirm these newest and superb method leads, really modern and super efficient. The technical power and the knowledge of our Tom are coming now in order to ultimate and define every little detail and give us the opportunity to offer to all the anglers a method leads range that really "work at the best level". Three different mold sizes, that permit us to have the correct lead for every fishing situation. And of course also the gummy molds built in relation to the three different sizes, in order to make the correct groundbait use on the same leads. From the mini methods to use in the most technical and difficult situations, coming through the medium sizes molds very suitable for fisheries, carpodromes, lakes and many other places and finally the biggest L size, really fine in order to feed with more baits and built with heavier leads in order to cast long way and eventually stay blocked in the stream situations!

FEEDER GUM

CODE	KG
00607006	2-4
00607008	6-10

An elastic gummy-line that is used a lot for feeder fishing all around the Europe: It is used just as a little piece of 20-25cm that link the hooklink with the original mainline. The small piece works like a damper during the fight's phase with fishes and help to win the most suspicious fishes during their bites. With the sizes 7 and 8 are normally won and caught also big fishes from 10 to 15 kg.

00994035	Abrasion	35

TERMINAL CLOTHED.

A coated braid that is simply unique for its strength and the no-tangle power. Very useful in the most difficult conditions even for the high abrasion resistance made by the coating combined with the braid. Now we can cast long wa without worries and we ca easily fish near the obstacles!

TERMINAL ABRASION.

A super soft and sinking braid with high resistance abrasion capacity. The structure is made with Ha Dyneema that permits to our braid to sleep straight on the bottom and to win the worst obstacles. Is ideal for make the most natural presentation permitting a 360 degrees movement of the hair rig combined with the hook.

OGIVE PORTOGHESI

The Portuguese school has always taught a lot in the surf casting world: linea longa, mullets, eagle fishes and long tail leads. Our national team member Eugenio Ucci has selected the shape of the Portuguese lead with the best aerodynamic characteristics modifying the stem, obtaining in this way a perfect lead for the long distance!!! The Portuguese ogiva will amaze you for the stability during the flight and for the perfect parabola that you can obtain, also with strong lateral wind. And again, the long shaft will help you during the reel reducing a lot the friction with the sand.

00208150	150
00208175	175

The Surfman was designed to contrast frontal and lateral streams, this lead is ideal to use when smooth leads start to lose hold and we won't use pyramid leads.

PERA

The lead much used in fishing from the boat, in colourful versions is good to get our preys curios getting them close to our baits. This lead is very used also during competitions of surfcasting because of its shape that increase the sensitivity of your rod.

00177150	150
00177170	170
00177190	190

The world champion in ocean we let us discover a revolution into leads category, like the 'pyramid' lead Keope that has a great hold on streams but also during reel in phase makes a very low friction. Eugenio Ucci has modified the Brazilian and French pyramid leads creating a perfect mix between hold and hydrodynamics; long stem helps the reel in reducing friction, lateral grooves stabilize casting also with strong frontal wind, flattened shape to increase hold on lateral stream. Thanks these features it's possible to use thinner lines reducing friction with lateral stream.

PIRAMIDE IDRODINAMICA

MADE IN ITALY

1 CF. 10 PZ.

CODE	GR
00138090	90

00138150	150
00138170	170
00138190	190

The normal pyramid leads have big skills of resistance to streams but also side effects: 1) leads shelve themselves and we can't take them out because of its flat basis that makes friction. 2) during reel in phase, the flat part slither on the bottom creating a force. 3) If we have mixed bottom we can't fish with standard pyramids because of repeatedly stops caused by its flat part. 4) during casting the basis of lead makes friction with the ground and goes upwind restricting ourselves in possible distances.

POLVERE PLASTIFICANTE

CODE	GR	COLOR
00191000	80	LUMINEX
NEW 00191001	80	SABBIA

The lead plasticized with the dust Luminex is able to attract our prey thanks to the luminescence that releases after have been in contact with a source of light for a few seconds. To speed and improve the loading, we recommend to use the Luminex led ultraviolet Maver flashlight, Art. 01312000. It can also be used in the daytime when we are fishing beyond a certain depth, because the dark activates the luminescence.

INSTRUCTIONS:

- 1) Heat the lead of flame without bringing it to the melting point (max 2 minutes for the heavier lead).
- 2) Sprinkle the lead still warm with plasticizer dust.
- 3) Immediately after re-put the plasticized lead on the flame until the plastic coating is not homogeneous (terminate before the plastic burning, about a minute)
- 4) Total time of plasticization, 5 minutes.

The rolling blade plays two essential roles on your lure. It brings to it a very high appeal enabling thus the carnivores to see it from a very far distance. The second role of the blade is to put a brake on the lure way down so it can act on the lure speed. The principle is very simple: the bigger the blade is, the more the blade will be slowed down so it will go down slower. As apposed to this, with a smaller blade your lure will be less held up so it will go down much faster.

GROUNDBAITS

BREAM BLACK

MADE IN ITALY

CODE	KG
3171S000	1

The groundbait 'Black Bream' is black coloured studied specifically for fishing bream, it has inside a great quantity of red bread and mixed hemp, basic ingredients to catch big breams. We can use this groundbait in different situations playing with the way to wet and on the pressure that we can make on the groundbait balls. if there's a strong stream or when we need to 'empty' the mixture it is also suggested to add some leam. We suggest also to cut this groundbait with the Winter Crash for fishing in still or slow waters, or with the Special Bream if there's stream or big depth. The proportions are in both cases 2:1.

1 BOX / 20 PZ.

SPECIAL BREAM

MADE IN ITALY

CODE	KG
3172S000	1

This groundbait names Special Bream was born from our European fishermen' request, medium/fine grain groundbait with bright brown coloration ideal for all those seabeds that are bright where we want create less contrast possible. In the mixture we find hemp, rape, red bread and coriander; extremely catching ingredients and essential to chase after big European breams.

1 BOX / 20 PZ.

UNIVERSAL

MADE IN ITALY

CODE	KG
3173S000	1

The Universal is a groundbait studied for some Italian competition fields where we often find different kind of fishes like bremes and crucian carps. Its colour is amber and it's medium grain that gives it an enough fast mechanical function once on the bottom, this allowed better to bring fish on the feeded area.

1 BOX / 20 PZ.

BIG BLACK MADE IN ITALY

CODE	KG
3174S000	1

A medium big mixture for this black groundbait, with sweet spicy flavor and rich of yellow bread and hemp seeds in order to create a little contrast on the bottom color! High sticky power but in the meanwhile very fast to work once you will put in the water! Ideal for chase for carps, crucian carps and bremes in the venues where we need a main dark groundbait. We can easily suggest to add Carpix or Touche additive : 100 grams of additive in 1 kg groundbait.

1 BOX / 20 PZ.

SPECIAL CANALE MADE IN ITALY

CODE	KG
3176S000	1

A brown groundbait from a medium size mixture and high percentage of belgic bread! This ingredient is permitting to the same groundbait to work really fast once that is getting on the bottom and is resulting perfect also for the feeder fishing technique! The little orange particles are creating stimulations on all the fishes those will rest on the feeding area for a long time! Ideal for cut and mix with other groundbaits characterized by high sticky power.

1 BOX / 20 PZ.

JURASSIC BLACK MADE IN ITALY

CODE	KG
3175S000	1

The Groundbait Jurassic Black has a fine grain and it's characterized by low sticky power, dark black color and distinctly spice aroma. It was studied for fishing bremes in canals with clear and cold water or where it needs a fast feeding. The main feature is the salted basis very appreciated by bremes and consist in a great diffusion of flavor in water. Thanks its mechanical features is ideal also for feeder fishing.

1 BOX / 20 PZ.

CARP RED SOUL MADE IN ITALY

CODE	KG
3189S000	2,5

red groundbait ideal for fishing carps in matches where a lot of catching groundbait is requested. This groundbait is produced by a perfect mix of catching ingredients and high-quality bread and a very powerful strawberry aroma. It's really good also to be used as a ready bait to put on the hook during a big fishing.

1 BOX / 10 PZ.

CARP YELLOW ENERGY MADE IN ITALY

CODE	KG
3190S000	2,5

dark yellow groundbait with a great sticky power and a great sweet panettone aroma, studied to be used during matches in Arno river. The big grain of this groundbait allow us to use the carp yellow energy everywhere.

1 BOX / 10 PZ.

CARP DELUXE MADE IN ITALY

CODE	KG
3191S000	1

dark yellow groundbait made by big grain with a sweet and zingy aroma with toasted hemp seeds inside. Its ingredients have a great sticky power. Its use is ideal for carps and for making this groundbait much more catching we suggest an addition of flour Carpix, 100 grams for kilo.

1 BOX / 20 PZ.

CARP STRATEGY MADE IN ITALY

CODE	KG
3192S000	1

yellow groundbait with medium-thick grain characterized by sweet honey aroma and medium-high stickiness. It is good for all those competitions where groundbait can make the difference! Adding Belgian bread to Carp Strategy can be perfect, also perfect to be use in match fishing technique on surface of canals and lakes.

1 BOX / 20 PZ.

CARPA CARASSIO MADE IN ITALY

CODE	KG
3000S000	1

Medium grain dark yellow groundbait smells of spicy coriander, its stickiness is medium/high. It's perfect to be used during competitions where it's often required the best attractant in less time possible. Its use is very easy when you wet its ingredients. Groundbait 'carpa carassio' has great performances also used with other groundbaits and makes the efficacy and scent better. In still waters, you can add Brasm to increase the attractant power in the measure of 100gr per kg. in stream waters, it's suggested to add at groundbait 'carpa carassio' 10% of PV1, or river's ground if you have to add weight to the mixture.

SPECIAL CARASSIO MADE IN ITALY

CODE	KG
3035S000	1

Medium thin grain yellow-orange groundbait has a medium-low stickiness' power and sweet-glazed smell with corn flakes. It's excellent for fishing Carass in canal and roaches. Depending on the degree of humidity the present ingredients allow the groundbait to open fast on the bottom or in presence of grass and seaweeds and to change the split in the midwater. Groundbait 'special carassio' has great performances also used with other groundbaits and makes the efficacy and scent better. In stream waters, it's suggested to add at groundbait 'carpa carassio' 10% of PV1.

BREME ENEMY MADE IN ITALY

CODE	KG
3193S000	1

dark brown groundbait with medium-thin grain and low sticky power thanks its high percentual of Belgian bread inside. it has a sweet molasses aroma that is ideal for big bremes in canals and lakes. In still waters we suggest using damp Terra di Somma.

BELGE CLASSIC MADE IN ITALY

CODE	KG
3143S000	1

This groundbait has been made for fishing bremens. it's a dark thin grain mixture with medium thickness power. The main feature that makes this groundbait flawless is the sweet and salted taste's factor. use: like all bremen groundbaits it's always suggested to wet it two or three times, add Terra di Somma and then sift it in order to make the mixture more blend and uniform as possible. Recommended cutting with "Winter Crash" in the ratio 2: 1 with the addition of the "Terra di fiume" in running water or with the "Terra di somma" in slow waters.

FONDO COMPETITION

MADE IN ITALY

CODE	KG
3099S000	1

Brown groundbait with red bread' particles inside very appreciated by the Bremens. This groundbait is excellent for fishing bremens but it can be used also for fishing Carass in canals with stream waters. use: like all bremen groundbaits it's suggestet to wet it 3/4 times and then sift it in order to make the mixture more blend and uniform as possible. In case it wants to reduce its stickiness power, it can be mixed with any other bremen groundbaits of Maver's range; if there are strong streams it recommends to add ground.

WINTER CRASH

MADE IN ITALY

1 BOX / 20 PZ.

CODE	KG
3089S000	1

This mixture is considered unequalled for fishing big or small bremens because its composition is very good to attract fishes with groundbait without never satisfy them. Use: like all bremen groundbaits it's suggest to wet it two or three times and then sift it in order to make the mixture more blend and uniform as possible. In still waters it's suggest to add 30% of terra di somma. The Winter Crash is an excellent groundbait "Cut": We can match it with the Abramis Black or the Belge Classic in the ratio 2: 1 with the addition of a lot of Terra Di Fiumein the race tracks.

ALBORELLA COMPETITION

MADE IN ITALY

1 BOX / 20 PZ.

CODE	KG
3102S000	1

This is the classic groundbait for alborella for fast fishing. it has very thin grain and light brown colour. Thanks its ingredients it produces a 'cloud effect' into the water that makes it irresistible for the little fishes. depending on the needs it can be used a bit dry or very wet. Use: it's suggests to add big quantities of water to reach solidity you want to have an excellent performance.

PESCHIERA

MADE IN ITALY

1 BOX / 20 PZ.

CODE	KG
3090S000	2

Light soft black groundbait with medium flour milling and medium power of stickiness. in the inside was insered a brand new and juicy cheese smell with filled quantity of grinded chrysalis.: these features make it particularly good for all competitions in rivers where chubs and barbi are. Peschiera is an excellent groundbait during competitions but good working also for enjoyable fishings out of competitions for sure. use: it's great if used in the Bolognese fishing and if spread big quantities of baits on the bottom.

ABRAMIS BROWN

MADE IN ITALY

***HOT PRICE**

CODE	KG
*3122S000	2

The features are the same of 'Abramis Black' but the only difference is the power of stickiness lightly stronger. Use: like all bremen groundbaits it's suggested to wet it two or three times and then sift it in order to make the mixture more blend and uniform as possible.

1 BOX / 10 PZ.

CANAL PLUS CRASH

MADE IN ITALY

***HOT PRICE**

CODE	KG
*3124S000	1

This precious mixture presents the same features of 'winter crash'. the only two differences are the flour milling thinner (so it's good for small bremens) and the addition of a natural smell of amaretto. Use: like all bremen groundbaits it's suggested to wet it two or three times and then sift it in order to make the mixture more blend and uniform as possible. if we have competitions in medium-fast stream waters also for the 'canal plus crash' it's suggested the union with 'fondo competition'.

1 BOX / 20 PZ.

BENTONITE

MADE IN ITALY

CODE	KG
3194S000	1

grey dried ground with very high sticky power that permits us to modify the dynamics of our grounds and groundbaits. If used in pure way can paste the fouilles

1 BOX / 20 PZ.

CARPIX

MADE IN ITALY

CODE	GR
3201S000	250

this sweet strawberry aroma ingredient is studied for fishing carp and caresses. We suggest to add Max 100 gr for kilo of groundbait or maggots.

1 BOX / 20 PZ.

TOUCHE

MADE IN ITALY

CODE	GR
3202S000	250

this sweet fruity orange supplement is ideal for fishing bremes and caresses, we can use it also to add seasoning in our baits for at least 24h. we suggest to add Max 100 gr for every kilo of groundbait.

1 BOX / 20 PZ.

BRASEM

MADE IN ITALY

CODE	GR
3203S000	250

Belgian yellow ocher ingredient is studied especially for searching big bremes. It's bitter and sweet lactose tasting. we suggest to add Max 100 gr for every kilo of groundbait.

1 BOX / 20 PZ.

BIG FISH MADE IN ITALY

CODE	GR
3204S000	250

this ingredient was studied for catching big fishes! It's infallible for all fishes! we suggest to add Max 100 gr for every kilo of groundbait.

high-level catching and sticky ingredients that allow the ready bait to stay stick together to the hook. All the Pasta Rapida are with the same basis but with addition of 6 different aroma basis on what kind of fishing session we have.

1 BOX / 20 PZ.

TORTEAU MAIS FINE

MADE IN ITALY

CODE	KG
3056S000	1

Compared to the big version, this Torteau can be included in the groundbait before the soak. The high power of water's absorption will increase the volume of your groundbait. Used in a larger quantity of 20% kg. it's good for fishing bleaks in lake.

1 BOX / 20 PZ.

TORTEAU MAIS GROSSO

MADE IN ITALY

CODE	KG
3009S000	1

Pour the contents in a container, add water up to cover everything. Let It rest for about 1/2 hours and then pour the mixture in the groundbait. The Torteau Corn made like this will be necessary to humidify your groundbait. (30% per kg).

1 BOX / 20 PZ.

PV1

MADE IN ITALY

CODE	KG
3008S000	1

The flour of PV1 having sugary basis will increase the sticky power of your groundbait. It's ideal to unite low sticky groundbaits.

1 BOX / 20 PZ.

PANE BELGA

MADE IN ITALY

CODE	KG
3050S000	1

This bread results barely sticky, so its main feature is to release before and to avoid the growing of clumps in the groundbait, making it soft. It's recommended especially for fishing bremens and crucians. (30% per kg).

1 BOX / 20 PZ.

RICARICA GOMMA ARABICA

MADE IN ITALY

CODE	GR
M010600R	500

Ideal for strong bondings, in rivers or canals where there is a lot of current and our ball must not lose anything on downhill.

COLLA DESTRIX

MADE IN ITALY

CODE	KG
3113S000	1

Ideal for gluing maggots.

DAMP LEAM BLACK

MADE IN ITALY

CODE	KG
3146S000	2

It is a somma leam of a black colour and it has got the same characters of the light one. Its dark colour is natural and it is used for making heavier the dark and black groundbaits in order too not create persistent spots that make the fishes suspicious if used into transparent or cold waters.

1 BOX / 12 PZ.

RIVER LEAM

MADE IN ITALY

CODE	KG
3148S000	3

It is a wet leam really binder and of a brown colour. It is perfect for give weight the groundbaits into fast waters or, if used in a pure way, it can also be used for vehicular our baits on the bottom.

1 BOX / 8 PZ.

DAMP LEAM

MADE IN ITALY

CODE	KG
3147S000	2

It is a somma leam very thin and of a yellowish colour and it is ready to use because is packed with a little umidity grade inside. It maintains itself as really soft and easy to sift, also when it is wet again. The same can be used to vehicular our baits or to be mixed with our groundbaits dedicated to the breme fishing. Used into the groundbait it increases the specific gravity of the same and makes faster its mechanics one time the ball pose itself on the bottom, creating in a few time, "a carpet" where the fishes will love to eat searching also our baits.

FASTEST FREE FORM PELLETS

1 CF. / 5 PZ.

CODE	MODEL	KG
2001S010	Strawberry	1
2003S010	Scopex	1

An innovative high-performance pellet made thanks by cereals and corn plus natural additives and aminoacids. Suitable for all the season but the special character is the super fast dissolving power with all the water temperatures, even in the coldest conditions. It creates an attractive carpet that makes the cyprinides crazy. Special for sticks, pva bombs and ideal for carpodromes and pole fishing.

ULTRA MAIZ

YouTube "ULTRAMAIZ"

1 CF. / 5 PZ.

Even with this news we wanted to develop a product thanks to the great fishing experience of our team and under various requests of our loyal customers: we are required to build up a fake corn range dipped into an high attraction liquid. We have finally created a combination of essences, flavors and amino acids where we are putting in total 10 fake corns: 5 of extra large size and 5 of standard size. The result is a superb fake bait even thanks to the bait dip, pva friendly, ideal for be used especially with pva bombs and stick mixes.

All the fake corns are pop up and their buoyant power is calculated in order to balance teflon hooks of size 2-4-6 in relation to the size of the same corn. The XL fake corns are always specifically colored in relation to the specific flavor, while the little ones(standard size) will be produced and sold always in the yellow color.

PELLET FISHMEAL STRATEGY

PERFECT FISH PROTEIN

NATURAL LIGHT FISH

PERFECT FISH PROTEIN: The best alternative when we need the real attraction and powerful signals from our feeding area. A very powerful pellet but not so much heavy, created thanks to the best fishmeals and also to a part of halibut extracts and flours. From the olfactory and taste points is simply perfect.

NATURAL LIGHT FISH: Made thanks to white fishes and pre-digested fishmeals! The perfect combination because extra balanced from nutritional and proteinic points. Lighter than the Perfect fish protein alternative in order to fish in the colder seasons or to approach to high pressure waters where carps and fishes are suspicious against "heavy" and high-flavor groundbaits and foods. The combination between the two kinds of pellets is of course suggestable: you can mix them in the percentage you desire, depending from the season, the water, the competition and the different situations. Both the pellets are born for method and pellet feeder but they are ideal also for carp-fishing sessions and fisheries style with the long pole!

A complete range of liquid sprays that will permit you to boost all kind of bait: boilies, pellets, maggots, corns and why not.... Even worms and clams.

BETAIN MELASSE

1 CF. / 5 PZ.

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 15-40ML PER KG

SUGGESTED DOSAGE FOR COOK 1 KG PARTICLES/CORN/HEMP/TIGERNUTS:
150 ML WHEN COOKING IS OVER, ADDING ALSO COLD WATER

SUGGESTED DOSAGE FOR 1 KG GROUNDBAIT/METHOD:
30-40 ML TO DISSOLVE IN WATER BEFORE MIXING

CODE	ML
3600S000	500

We have combined the sweet properties of the molasses with the super attraction of the Betaine. We can use this for make our self made boilies or for create bait dips and even for cook the particles. Inside this beautiful compound you can find 11% protein and 14 different kind of natural amino acids.

NHDC

1 CF. / 3 PZ.

CODE	ML
3500S050	50

The best Nhdc on the carpfishing market. A sensational sweetener that we have found in the most pure structure, without any modification or cut in order to maintain the maximum quality. It is simply the maximum level of NHdc that you can try.

Suggested dosage: from 3 to 5 ml for 1 kg boilie mix.

STABILIZER

1 CF. / 5 PZ.

CODE	ML
3700S000	500

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 30-50 ML

A soft liquid that is coming from the human food sector: it is totally without taste and flavor and once you insert it into your liquid base it doesn't permit the mold formation on the same baits and will grant the correct softness in order to let them work in the best way in the water.

CSL STRONG (CORN STEEP LIQUOR)

1 CF. / 3 PZ.

CODE	ML
3101S250	250

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 25-40ML PER KG
SUGGESTED DOSAGE FOR 1 KG GROUNDBAIT/METHOD:
30 ML TO DISSOLVE INTO THE MIXING WATER

The most precious Corn steep liquor that we have ever tested. We did not want to introduce a medium quality one and we have taken the correct time to find someone that will satisfy us at the best level. We can use it in the self made receipts but is also perfect to make bait dips or for cook particles.

LIVER LIQUID 100%

1 CF. / 3 PZ.

CODE	ML
3100S250	250

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 25-50 ML
SUGGESTED DOSAGE FOR 1 KG GROUNDBAIT/METHOD:
20-40 ML TO PUT IN THE MIXING WATER

A liver liquid extract that is superlative for the carps. It is totally pure and has got inside a lot of amino acids and animal proteins. It will run very well even in difficult natural waters. The combination with fishmeals and birdfish mix is perfect.

LIQUIDS FOODS

1 CF. / 3 PZ.

We began our hard work from the best solid raw materials in their real original nature in order to create a liquid food range of superb quality and purity. Superlative under the organoleptic qualities point of view and really amazing for taste and smell. We have never tried something similar before and we are really proud to put in the market such precious items. These are liquid foods born for the self made technique but even for boost groundbaits, methods stick mixes, particles and many many more.

The Reactor baits team is always concentrated creating new and super efficient additives, so we have decided to make the EVOLUTION from our original syr-ups and the result is a new liquid range of superb quality. Created thanks to a mix of high quality flavors and essences, the real secret are of course the appetite stimulators and also the amino acids used for build up this syr-up range. Another gold point are for sure some secret solvents able to spread out in the water, in the most correct way, all the essences, amino acids and the nutrients. An ideal product able to boost your stick mixes, pva bombs, groundbaits, pellets and mixed particles. Completely pva friendly.

SUPER MAIS OIL

CODE	ML
3102S250	250

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 25 FOR KG
SUGGESTED DOSAGE FOR 1 KG GROUNDBAIT/METHOD:
35-40 FOR KG

We are really expert in create and develop all the corn extracts and derivates. We have extracted pure corn oil really rich of bioelements and natural vitamins. This one will be your certain arm for catch grass carps and big carps especially in natural venue. Really interesting the use inside match fishing groundbaits and feeder ones.

LIVER EVOLUTION

CODE	ML
3103S250	250

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 20-25 FOR KG
SUGGESTED DOSAGE FOR 1 KG GROUNDBAIT/METHOD:
35 FOR KG

A really new liver extract created after a lot of studies and developments based on proteic and nutritional values. A really new winning formula where the comparison with other competitors is not definitely possible. Ideal for be inserted in groundbaits, method mixes but even for create superlative self made boilies.

VER DE VAS EVOLUTION

CODE	ML
3109S250	250

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 20-25 FOR KG
SUGGESTED DOSAGE FOR 1 KG GROUND B./METHOD: 35 FOR KG

he natural food for each fish from the birth moment: simply the ver de vas! Mosquito grub in the initial evolution estate that are selected and mixed thanks to the best natural solvent. Is a cray attractor for what concern match fishing groundbaits, feeder ones but also for the carpfishing, especially in natural waters. A iperproteic solution that has got results without any possible comparison!

SHRIMP PURE

1 CF. / 3 PZ.

CODE	GR
3753S000	100

Pure shrimp extract from the best quality norwish waters. The color, the smell and the taste will impress you from the first uses, as the results it gave us during the tests into self made boilies, groundbaits, methods and many more uses that will depend only from your mind feeling and fantasy! Important to understand is the fact that is a pure shrimp meat flour so it will not float at all.

OILS 250

CODE	MODEL	ML
3110S001	Salmon	250
3110S002	Fish&Pellet Oil	250
3110S003	Hemp	250

Our complex oil range is enriching itself without compromises, inserting 3 different new ones, all searched and found thanks to our traders who are chasing for us all the raw materials, animal origin or vegetal, that are considered simply unique and the best ones, very difficult to find without the correct professionals. All these oils are "cold extracted" and created for the widest range of uses: from the self made to the boost of pellets, particles, groundbaits and methods.

BELACHAN QUAD

1 CF. / 3 PZ.

CODE	GR
3752S000	250

A belachan past of superlative and not imitable quality. Really pure and iper attractive. It is coming from the purest fermented shrimp, simply the best foundable in the raw materials market! If you are looking for something really unique and able to catch the fishes even in the most difficult moments, you are selecting the correct product! Ideal for be cut and added in order to enrich groundbaits, methods and mixed particles but even as a cover for the hookbaits in order to release simply a superlative and constant attraction for many hours.

FLOUR & ADDITIVES

ROBIN RED ORIGINAL HAIT'S

1 CF. / 3 PZ.

CODE	GR
3300S004	500

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 30-150 GR

A total warranty for all the carp anglers: we wanted to insert into our range simply the original one! Is totally pure and we don't need to present it a lot... you need to try and you will be forced to come back!

SALMON FLOUR / FARINA SALMONE

1 CF. / 3 PZ.

CODE	KG
4800S003	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 70-150 GR

It is quite rich of oils and omega 3/6 and as other fish flour is plenty of nutritional capacities and proteins. It is quite well digestible for all the fishes. We suggest to use it for create birdfish and fishmeals mix even because it will help us to "glue" the mix in the correct way and especially because it gives a great taste to the final bait! It will be a real bomb!

FAT SOYA FLOUR / SOYA GRASSA

1 CF. / 3 PZ.

CODE	KG
4800S013	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 50-80 GR

It's even more rich than the micronized soya that we have described above. It is plenty of fatty acids and essential amino acids. Its taste is again more strong but as flour it is a bitt less digestible than the classic soya flour. It's suggested to combine it with the micronized soya flour in order to exhalt the properties of both and to have the best result in terms of attraction and digestion. Perfect to use in the warmest months.

ROASTED MAIS / FARINA DI MAIS TOSTATO

1 CF. / 3 PZ.

CODE	KG
4800S012	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 100-250 GR

Is really helpful in each kind of mix. The corn is the oldest and most efficient baits for the carps. The roasting of this flour make the same really precious and boost the same taste. The grinding is not at the maximum level so we can use it for increase a bit the granulometry of our mixes and let them work faster!

HEMP FLOUR / FARINA DI CANAPA

CODE	KG
4800S014	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 50-100 GR

The hemp is another bait really appreciated from the carp, especially when the quality or the treatment enrich it to the maximum level as our hemp flour. It stimulates the appetite and get the carps crazy but normally must be used in the warmest seasons or when the waters are not cold.

RED FISH FLOUR / FARINA SCORFANO

1 CF. / 3 PZ.

CODE	KG
4800S017	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 100-150 GR

Rare and really particular fish flour: super attractive and very delicate taste for catch more and more carps! It can combine it with all the fish flour you want (even with extracts, hydrolyzed powders etc etc) but it simply can be added as unique fish flour into one birdfood boilie mix in order to boost the attraction, protein percentage and taste!

ROASTED NUT FLOUR / ARACHIDE TOSTATA

1 CF. / 3 PZ.

CODE	KG
4800S015	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 50-100 GR

Superlative flour that cannot miss into your fruity and summer combinations. This proteinic and oily compound will help us in the moments where carps are searching for energies and nutritional elements. It can help us even when we need to avoid the destroying activity of the little fishes on our baits. It is really tasty and is simply the best nut flour on the market.

HEMOGLOBIN / PROTEINIC VALUE 86%

1 CF. / 3 PZ.

CODE	KG
4800S007	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 30-80 GR

Hemoglobin extract with a really high proteinic power: in the latest year it is become famous for its fantastic attraction capacity! We can use it with assured results for create our hookbaits (boosted) when we increase a bit the medium average quantity of this flour.

ANCHOVY FLOUR / FARINA ARINGA

1 CF. / 3 PZ.

CODE	KG
4800S001	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 100-200 GR

High digestible flour but plenty of nutritional effects; it can be added in a little percentage in each kind of boilie mix. It's rich of oils and natural properties that will boost the performances of your self made baits. The same oils will make easier the rolling work of the main mix.

TUNA FLOUR / FARINA TONNO

1 CF. / 3 PZ.

CODE	KG
4800S002	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 100-200 GR

It is a bit less oily than the anchovy flour and also compared to other fish flours. It can be easily added in all the mixes even in the 50/50 ones. Superlative powder for the natural waters as lakes and rivers.

SWEET MILK FLOUR / FARINA DI LATTE

1 CF. / 3 PZ.

CODE	KG
4800S025	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 100-150 GR

We have selected one the most precious milk flour that we found in the raw material market. The taste is really sweet (not salty) and this is the best milk you can use in your self made receipts. It is chosen also for its structural properties and for the low percentage of fats.

POLLACK FLOUR / MERLUZZO GIALLO

1 CF. / 3 PZ.

CODE	KG
4800S018	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 70-150 GR

The range of fishmeals is completed thanks to this really particular Pollack flour that is something really delicate but superlative for the self made world. The Ph of the Pollack fish is really acid and it will helps us to make acid baits when we need to be in contrast to the water ph that is normally basic. The attraction properties are without limits and combined with other fish flours it will grant you the best results. Try to combine it with dried insect and water dried flies.

BIRDFOOD :

BIRDFOOD PURE

SPICY BIRDFOOD

NECTAR BIRDFOOD

INSECT BIRDFOOD

1 CF. / 3 PZ.

Finally, the best has come after a lot of time and great and important cooperation: Birdfish is that what you were waiting for! available in 4 different aromas with an excellent quality.

CODE	MODEL	KG
4800S026	BIRDFOOD PURE	1
7558S001	NECTAR BIRDFOOD	500 gr
7558S002	SPICY BIRDFOOD	500 gr
7558S003	INSECT BIRDFOOD	500 gr

BIRDFOOD PURE: Thanks its properties with a good percentual of milk and egg with a lot of nutritional and protein properties that makes it perfect for you fishing. it is usable for every kind of mix without limits and can become a super secret for enriching groundbaits for match, method and feeder fishing. **Suggested dosage for 1 kg boillie mix: 100-200 gr / Suggested dosage for 1 kg method/groundbait: 80-130 gr**

NECTAR BIRDFOOD: We cannot not create special honey components. great taste properties come with nutritional one making it one of the most balanced birdfood on the market. special to enrich mix 50/50 or sweet and creamy birdfood. **Suggested dosage for 1 kg boillie mix: 80-130 gr / Suggested dosage for 1 kg method/groundbait: 70 -150 gr**

SPICY BIRDFOOD: Dried mixture characterized by sensory properties and micro-particle of the best natural spices from the East. it's ideal to enrich birdfish, fishmeals but also groundbaits and method for feeder. **Suggested dosage for 1 kg boillie mix: 80-130 gr / Suggested dosage for 1 kg method/groundbait: 70 - 150 gr**

INSECT BIRDFOOD: We decided to exaggerate studying a really complex and high-protein mixture adding a special blend of dried bugs that make this birdfood a must have! **Suggested dosage for 1 kg boillie mix: 50-100 gr / Suggested dosage for 1 kg method/groundbait: 70 -100 gr**

MICRONIZED SOYA FLOUR / SOYA MICRONIZZATA

1 CF. / 3 PZ.

CODE	KG
4800S008	1

SUGGESTED DOSAGE FOR 1 KG BOILLIE MIX: 100-200 GR

It is a real particular micronized soya flour. It is a product really specific for the carps and all the monogastric animal that own only one digestive enzyme into their body structure. This flour will grant you all the proteins, oils and especially emulsifier properties (that it naturally owns) but in the meanwhile give you the triple of the digestive properties when compared with a normal soya flour.

SPECIAL - FLOURS

BETAINE KLASS A1

1 CF. / 3 PZ.

CODE	GR
4800S024	100

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 15 GR
SUGGESTED DOSAGE FOR 1 KG GROUNDBAIT: 25 GR

We are not making miracles but we are always searching something different and best quality compounds. From all the appetite stimulators we have tested in the last seasons we have found out a superlative betaine that will boost the appetite from the carps.

PROTEINIC ALBUMINE

1 CF. / 3 PZ.

CODE	GR
4800S005	500

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 30-50 GR

It will help to roll the mixes thanks to the sticky properties and in the meanwhile is full of proteins. We must use it with care.

INSECTOS

1 CF. / 3 PZ.

CODE	GR
4800S023	100

A new precious compound coming from dried fouillies and jokers, well recognized with the name Bloodworms that represent the diet of all the fishes and cyprinides that normally find them on the freshwater bottoms... nothing more natural and attractive exist in nature!

SPIRULINE WEED / ALGA SPIRULINA

1 CF. / 3 PZ.

CODE	GR
4802S350	350

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 20-50 GR

A really particular weed extract that must used in little percentages . Is one of the unique weed that present so high proteinic percentage!The combination with the hemoglobin and fishmeals is simply the maximum you can reach.

MUSSEL EXTRACT

1 CF. / 3 PZ.

CODE	GR
4801S350	350

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 30-70 GR

The mussels always represent the best natural quality food for carps. This pure extract is the maximum that you can use into your fishmeals or when you are searching simply the best green lipped mussel extract powder!

SEMOLINO

1 CF. / 3 PZ.

CODE	KG
4800S009	1

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 100-250 GR

It seems a poor flour but from ages is used from the carpers in order to "glue" the mixes with an element that likes to the carp a lot.

FLOUR DUST / POLLINE DEI FIORI)

1 CF. / 3 PZ.

CODE	GR
4800S016	150

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 20-40 GR

A super secret that few anglers know! Difficult to reach but magnificent to use. Fermented flour dust that is rich of minerals, vitamins and amino acids. You can think that 100 gr of this product reflect the proteinic value of 500 gr meat or of 7 eggs. In plus it will reach the result to stimulate the animal enzymes in order to help them to make better food digestion. A mega attraction is also granted. For all the self-made lovers can become simply "a must" inside the receipts.

KRILL MEAL

1 CF. / 3 PZ.

CODE	GR
4800S350	350

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 30-100 GR

The krill meal effect is well recognized worldwide and we are here presenting simply the best krill, extremely pure and very difficult to find on the market. Nothing floating and not mixed to crustaceans or shrimps. It will need only a little percentage in order to create a "sea" effect inside your baits. Cyprinides will come crazy and your catches will improve quickly.

DRIED WATER FLIES / PULCE D'ACQUA ESSICCATA

1 CF. / 3 PZ.

CODE	GR
4803SBAG	350
4800S019	150

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 20-50 GR

The water insects and water flies are one of the natural foods most appreciated by the carps. I have tested this compound from my young age and I found them fantastic especially in spring and autumn seasons when carps are searching for high nutritional/proteinic food. I am enthusiastic to have found a similar product because it seems that the carps are recognizing this food source as really natural and quite unique!

STRATEGY METHOD NEW

After the big success brought from the method luxury range, we are simply innovating presenting a particular and first quality method collection! Created thanks to first quality raw materials and natural compounds, we have selected the elements just from super certified sources. We have mixed them thanks to the professional indications coming from our british anglers, simply the best anglers and most winning people in the fishing world. Combined in the most accurate way in relation to the desired kind of method structure, controlled sticky power, super digestible features and mega attractive power are only the first characters for this new super collection. We cannot desire and dream something more suitable for our sessions and competitions, and once you have tried them you cannot search something different... let's bet with us!

CODE	MODEL	GR
2039S000	Peneapple Banana	800
2039S001	Fishmeal Amino	800
2039S002	Red Krill	800
2039S003	GLM Crab	800
2039S004	Fruit Power	800

FORMULA RANGE 1 CF. / 6 PZ.

The formula range is specifically built for all those anglers (even competitors) who need to attract the fishes in their spots in the most quickly way. Ideal for the feeder technique but also for the match competitions. Are created thanks to some secret ingredients that will satisfy you and bring you again to select one of our Formula groundbaits.

CODE	MODEL	KG
4999S000	Krill Rage	1
4999S001	Candy Match	1
4999S002	Fish Power	1
NEW 4999S003	Sausage & Spice	1

FISH POWER: If you are searching for the best fishmeal groundbait you are on the correct way. we have used the best fish flours but also some vegetal ingredients in order to create the perfect combination under the attractive profile but also in order to not give too much protein to our possible catches.

KRILL RAGE: You will find inside the highest quality krill meal you have ever used, mixed to fishmeals and a bit of meat extracts. A real bomb for all your competitions but in the meanwhile you will not risk to get the fishes "full" thanks to the control of the nutritional power of our Formula.

CANDY MATCH: If you love the sweet groundbait you will fall in love with this Formula that is totally created for all the spots where the fishes like sweet flavors and tastes. It's ideal for the attract the fishes in the most quick way and catch a lot of time in few time.

SAUSAGE & SPICE: The best add that we could make to the Formula range. We have boosted a very high quality groundbait base with the best smoked sausage essence but especially with a really high quality natural spice mix. A bit of Betaine and we can play at the maximum level. The best groundbait for big bremes or for catch carps and esturgeons!

YouTube "FEEDER INVERNALE IN CAVA"

LUXURY METHOD RANGE

1 CF. / 5 PZ.

CODE	MODEL	KG
2031S000	Amur Method	1

4 different kind of method mixes for our Luxury range. These are really suitable for realize stick mixes, pva bombs, competition groundbaits ma especially for the feeder ad method feeder sessions.

AMUR METHOD: made thanks to 12 different vegetal extracts.

JUICY MICRO PELLETS

1 CF. / 3 PZ.

YouTube "JUICY PELLETT"

CODE	MODEL	GR	MM
5001S000	Strawberry	500	3
5002S000	Tutti frutti	500	3
5003S000	Halibut	500	3
5004S000	Spice	500	3
5005S000	Honey	500	3
5006S000	Caramel	500	3
5007S000	Mix	500	3
5008S000	Betaine Green	500	3
5009S000	Krill	500	3
5000S000	Cheese	500	3

A really practical 500 gr box filled with 2-3mm micropellets that is really good for feeder and method feeder technique. It is plenty of aminoacids and flavors in order to be a real candy for all the fishes. Inside the box we have put a little syrup jar, 50ml, with the same flavor of the micropellet. For use it in the best way is necessary to drop down all the 50 ml syrup inside the pellets, plus 25 ml of water: after 2 minutes the micropellet is ready for be "glued" on method feeder leads.

KOLOR-IT

1 CF. / 5 PZ.

CODE	MODEL	GR
2053S000	Red	300
2053S001	Black	80

SUGGESTED DOSAGE FOR 1 KG GROUNDBAIT: 2 TEASPOONS

A real new groundbait die, available in red and black color. You'll need only two tea spoons in order to color in the best way your favorite groundbaits; a really natural additive that will not modify the taste and the flavor of your baits.

CLOUDY REACTION

1 CF. / 5 PZ.

CODE	MODEL	GR
2052S000	Pink Fluo	250
2052S002	Red Fluo	250
2052S003	Black	250
2052S004	White	250

The Cloudy Reaction compound, if inserted in the groundbaits or in your method mixes will make an incredible water reaction making a big cloud that will be able to attract even the most far fishes, thanks to the formidable visive impact of the same super cloud.

PASTA RAPIDA MADE IN ITALY

CODE	AROMA	GR
3195S000	STORIONE (BROWN)	300

2039S001	Fishmeal Amino	800
2039S002	Red Krill	800
2039S003	GLM Crab	800

R - SOFT DUMBELLS

1 CF. / 5 PZ.

CODE	MODEL	GR	MM
5027S000	Sausage (Dark Red)	40	8
5028S000	Krill (Dark Red)	40	8
5030S000	Betaine Green (Green)	40	8
5030S001	Cheese (Whitel)	40	8
5030S002	Halibut (Black)	40	8

Thanks to bread, cereals and the best stimulators by Reactor Baits the R-Soft Dumbells is a little treat successfully usable in salt water. Once the contact with water has been made, the little dumbell itself will start to disperse color and particular attractive liquids. It's ideal for feeder fishing in the sea or for fishing from harbors and rocks.

BREAD CANDY

1 CF. / 5 PZ.

CODE	MODEL	MM
6700S001	Garlic (Natural Color)	10
6700S003	Halibut (Dark Brown)	10
6700S006	Cheese (White)	10

As in the freshwaters as in the sea, all the fishes love the bread as food! We have pressed it, presenting little bread balls colored and flavored in different ways. We have prepared them, linking a bit piece of braid that will help you for put the same bait on your hook in an extreme practical way. Ideal for the fisheries but also for catch a lot of fishes in the sea.

SUPER MAIS

1 CF. / 5 PZ.

CODE	MODEL	GR
5021S000	Garlic (Yellow)	100
5023S000	Krill (Red)	100
5024S000	Betaine Green (Green)	100
5031S000	Halibut (Black)	100
5032S000	Cheese (Natural)	100

Corn is the typical bait for fresh water, and thanks the using of particular attractors and stimulators can be a secret weapon also for particular pelagic fishes like salpa, bogas and many others.

R - SOFT PELLETS

1 CF. / 5 PZ.

CODE	MODEL	GR	MM
6800S006	Betaine (Green)	40	8
6800S007	Cheese (White)	40	8
6800S002	Garlic (White)	40	8
6800S003	Krill (Dark Brown)	40	8

Thanks to the particular bread's production, cereals and corn we created a hookbait pellet particularly soft and appropriate to attract and deceive a lot of fishes in salt water.

JUICY MICRO PELLETS

1 CF. / 3 PZ.

2 mm micropellet available in a handy pack of 500gr containing 50ml of syrup in order to boost it and increase the attraction. Superlative for feeder technique in the sea but also to be throw with catapult searching for sea breams, saragos, mullets and others pelagic fishes catchable from the coast.

CODE	MODEL	GR	MM
5003S000	Halibut	500	3
5008S000	Betaine Green	500	3
5009S000	Krill	500	3
5000S000	Cheese	500	3

SHRIMP PURE

1 CF. / 3 PZ.

CODE	GR
3753S000	100

Pure shrimp extract from the best quality norwish waters. The color, the smell and the taste will impress you from the first uses, as the results it gave us during the tests into self made boilies, groundbaits, methods and many more uses that will depend only from your mind feeling and fantasy! Important to understand is the fact that is a pure shrimp meat flour so it will not float at all.

BELACHAN QUAD

1 CF. / 3 PZ.

CODE	GR
3752S000	250

A belachan past of superlative and not imitable quality. Really pure and iper attractive. It is coming from the purest fermented shrimp, simply the best foundable in the raw materials market! If you are looking for something really unique and able to catch the fishes even in the most difficult moments, you are selecting the correct product! Ideal for be cut and added in order to enrich groundbaits, methods and mixed particles but even as a cover for the hookbaits in order to release simply a superlative and constant attraction for many hours. Iper used even for the self made, dissolving it in the liquid bases.

FLAVOURS

1 CF. / 5 PZ.

CODE	MODEL	ML
4600S005	Garlic	50
4600S006	Anchovis	50
4600S009	Salmon	50

All the flavors and essences of the range Reactor Baits are perfect to exalt the attraction' potentialities of your sea groundbaits or hookbaits. Just insert some flavor ml into the water that you use to wet your groundbaits and its attraction properties will be tripled! It's ideal to boost baits like worms, maggots and hookbait paste.

Suggested dosage for 1 kg of groundbait is: 1,5-2ml.

FLAVOR EVO

1 CF. / 4 PZ.

CODE	MODEL	ML
7561S001	GLM	50
7561S002	Chilli Pepper	50
7561S005	Squid Octopus	50

SUGGESTED DOSAGE FOR 1 KG BOILIE MIX: 4-6 ML FOR KG
SUGGESTED DOSAGE FOR 1 KG GROUND BAIT/METHOD:
6-10 ML TO DISSOLVE IN WATER

After the giant success of the Reactor flavors we have studied and selected a new range of flavors created thanks to a real new combination and mix of essences coming from innovative extraction and creation method! Each flavor is made combining 5 blends of the same essence and the result is simply out of mind! Laboratory tests underlined perfect spread and propagation in the water also thanks to innovative solvents created in the specific way for make a superlative, new work. Simply never seen before... even independently from different situations and water temperatures!

OILS 250

CODE	MODEL	ML
3110S001	Salmon	250
3110S002	Fish&Pellet Oil	250
3110S003	Hemp	250

Our complex oil range is enriching itself without compromises, inserting 3 different new ones, all searched and found thanks to our traders who are chasing for us all the raw materials, animal origin or vegetal, that are considered simply unique and the best ones, very difficult to find without the correct professionals. All these oils are "cold extracted" and created for the widest range of uses: from the self made to the boost of pellets, particles, groundbaits and methods.

LIQUID FOOD

1 CF. / 3 PZ.

BELACHAN PRO: The best shrimp liquid that is coming us from Norway after the "cold fermentation process". The purest in the market.

GLM PURE: you have never seen such green lipped mussel quality in its liquid form. Very rare but extremely rich. An extract which will permit you to catch a lot of big carps.

KRILL PRO: We know what is the real krill meal and we have already purposed it in the flour dry quality (4800s350). Now we have produced it in its purest and best liquid form. Its use will surprise you and let you use the best krill liquid you could find around the market.

RED TUNA: Into our liquid food range we have inserted the Red Tuna liquid, extremely rich of Omega 3-6 and fine quality lipids. Simply fantastic the taste and the attraction power, it is ideal for be used into each kind of seafishing groundbait in order to attract and catch all the fishes that are living near harbors and rocks.

HOT RED TUNA: We are in front of the red tuna liquid food enriched with the best quality hot spice extract. The super-be qualities of the red tuna liquid are now boosted from the spice mix that are attracting fishes in the quickest way that simply love the resulting mixed taste of the two components. Ideal for catch and attract all the sea fishes in the fishing area, especially the biggest and most important ones.
