# PRODUCT CATALOGUE 2020

# WELCOME

A very warm welcome to the new 2020 Maver catalogue. Technology, Innovation & quality is at the heart of every new product launched by Maver for this coming year. 2020 heralds a new era with improvements of classic ranges, as well as numerous new and exciting additions to our product range that maximises the enjoyment our fellow anglers get each time they go fishing.

The new flagship Superlithium pole, incorporating all the latest Reglass SRL technology has been extensively tested and scrutinised by our team of International anglers and is nothing short of sensational! In addition the new classy Signature 821 & 921 range is mind-blowing. Upgrades and major improvements to the Oculus & Definition poles justify our position as the world leaders in the pole fishing sector.

Two new stylish seat boxes cater perfectly for the legion of Maver fans out there. The Signature D36 compliments all our top-end Signature products, with a discreet colour scheme and graphics, this just oozes quality. For those on a tighter budget the MV-R Performance seat box will be a huge seller, with features & looks of a £500+ product.

Our new Signature & Reality plus XS rods will certainly turn heads out on the bank, the latter being the best value rods you're likely to see this year. With new keepnets, side trays, pole rollers, hook ranges and beautiful float ranges being just some of the mouth watering new additions.

Look out for our new modernised clothing range. The MV-R 25 is by far the best waterproof suit we have ever developed, combined with a more stylish range of Maver attire including jackets & hoodies. Not only practical and comfortable, they look great!

Finally, check out our website [www.maver.co.uk](http://www.maver.co.uk) which is regularly updated and will feature some very exciting mid-season introductions to the Maver product range.

Enjoy the catalogue and on behalf of myself and all of the team at Maver, we wish you a very happy 2020.

## &gt; SUPERLITHIUM 16m &lt; NEW 20

A sensational new flagship pole from Maver for 2020. The Superlithium is possibly the greatest commercial pole we have ever produced, which is some statement considering our history of producing top class poles. Manufactured from the highest level of super high grade modulus carbon fibre, the Superlithium is finished in the elegant Suncore anti-friction surface utilising STER toughened epoxy resins and Nanolith technology. The top 5 will also interchange for those with the Darkside range of poles. The pole comes supplied with three different 2pc kits (all the same length), with the Matchlite kits constructed from the highest grade of carbon available. The Power carp kits have been modified to enhance their performance with a wider taper throughout to accommodate a 5mm bush. 2 bi-conical extensions are added to the package as well as classy pole end protectors. Designed and tested by Welsh International Lee Edwards, who has left no stone unturned in his quest to produce the strongest commercial pole we have ever seen. The flagship Superlithium is bursting with innovation, style and performance and is, without doubt a real gem that we at Maver are incredibly proud of! The Superlithium comes supplied with a very comprehensive kit package and is available with a choice of two different kit options – Match or Commercial.

## &gt; OCULUS 799 XS 16m &lt; NEW 20

New and improved spec for 2020, The Oculus 799 strength is second to none due to the inclusion of the exclusive STER resins & high tensile carbons. Built as an all-round pole, the Oculus 799 is perfectly suitable for rivers, canals & lakes. It is, however, at it's most impressive when targeting modern day commercials where large carp are present. With the unique power kits in place, larger elastics will easily tame the biggest carp. The Oculus really does 'have it all', including our patented black Suncore anti-friction finish which provides further wall strength due to the fine honey comb of metal fibres bonded to the outer surface. All the power kits are fitted with quality PTFE side slots for modern side puller elastic systems along with PTFE internal bushes.

## &gt; OCULUS 999 XS 16m &lt; NEW 20

With new spec for 2020 the Oculus 999 is simply outstanding! Manufactured from high tensile Japanese carbon fibres which we bond to our own factory produced pre-pregs incorporating our own unique resins producing a pole that is incredibly stiff, beautifully balanced and ultra light. With the unique power kits in place, larger elastics will easily tame the biggest carp. The innovative Fusion joints present on the power kits helps maintain the rigidity and tip speed with larger elastics. The inner Magic Steps substantially improve the free flow of all elastics. Teflon joints are applied to sections 3,4,5 & 6 eliminating carbon to carbon wear. Poles of this quality & features would easily command a selling price well in excess of £2000+.

## > DEFINITION 13/14.5m

New and improved for 2020, our best selling pole - just got even better! By tweaking the technology in the larger sections, we have now made the Definition even more responsive. Not just a cosmetic change, be sure to check it and tell us we're wrong! European technology at it's very best presenting a pole firmly aimed at the club & pleasure angler alike. Although budget price tagged, the quality, build & package destroys it's competitors by a country mile! Manufactured utilising a high tensile carbon and bonded to our unique STER & 4 MAT epoxy resins, the Definition has the feeling of a match pole but the strength to tackle any commercial venue. It's a true all-rounder that is suited to rivers, lakes & canals but with the power kits fitted will handle any carp that swims. At 11.5m the weight is an impressive 615g & at 13m (mini ext. excluded) just 875g.

All sections include the innovative black Suncore finish. The honey comb of fine metal fibres provide additional strength and ease of shipping in all weather conditions is quite simply 'the best'. Teflon joints have been applied to sections 3,4,5 & 6 eliminating carbon to carbon wear. Magic steps are present internally on all match and power kits. The Powerlite power kits have been banded for additional strength and factory fitted with high quality PTFE side slots. Each power tip is also fitted with internal PTFE bushes as standard.

The high quality power kits also feature our Fusion technology substantially increasing rigidity & tip speed when heavier elastics are fitted. A very stiff, well balanced pole supplied with a generous kit package.

The Oculus 7m is the ultimate in strong margin poles. Manufactured from high tensile carbon, this pole has been built specifically to target large edge fish. Boasting incredible wall strength, the Oculus margin pole can be fished with 18-20 Dual Core Pro elastic in place with extreme confidence. Featuring sections which will interchange with the Oculus poles, they boast an impressive amount of power when large fish are hooked with a progressive fish-playing action. The pole comes supplied with a power kit inside the pole, which will interchange with the Signature, Definition & Oculus ranges. Kits come supplied pre-bushed and pre-slotted to accommodate Maver's best selling 'Easy Flow' side puller kit. Finished utilising the innovative Suncore finish, Teflon joints, Fusion and Magic Step technology.

## > SIGNATURE WHIP 8m

With the revival of rivers pulling anglers back to wild & natural angling, we at Maver have designed a lightweight line to hand whip which is certain to impress. Manufactured from hi-tensile carbon fibres and reinforced with our unique & propriorty resins. The new Signature whip is supplied at 8m as standard and weighs a featherweight 365g. The top 2 kit is telescopic and the remainder is take-apart allowing the angler to fish whatever length required by simply removing or adding sections. All sections have reinforced joints and features our innovative and unique black anti-friction finish for shipping at speed. It's the ideal pole for speed fishing and is supplied with a solid carbon flick tip spliced into the number one hollow section. If it's roach & skimmers you are targeting down the track of a canal, simply remove the flick tip and replace with the hollow tip to house light elastics. Supplied with a flick tip top 3 kit inside the pole plus a spare top 3 and 2 hollow tips. A stunning light but strong line to hand pole with substantial rigidity!

------	---------------	-------

## &gt; SIDE SWIPE REST

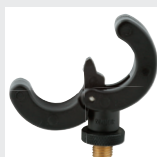

RRP  
£4.49

This Side Swipe rod rest allows accurate placement of feeder rods. The multi-tilt head and large 'up-stand' prevents rods being dragged in, whilst the sloped side rail enables the angler to effectively "swipe" the rod from the rest when bites occur. Can you afford to be without one? Simple but brilliant!

RRP

J925	SIDE SWIPE ROD REST	£4.49
------	---------------------	-------

## &gt; AUTO CLASP ROD REST

RRP  
£4.99

Eliminate the possibility of having your rod pulled in when feeder/method fishing. By simply placing your rod in the 'auto-clasp' rest when a savage bite occurs the rod will not be pulled off the rest into the lake/river. However, just a gentle lift/strike releases the clasp and puts you in contact with the fish. Suitable as a front or back rest.

RRP

## > SIGNATURE PRO CLASSIC 3PC MATCH RODS

Featuring a fine hollow tip designed to be used in conjunction with light lines and small hooks, these rods have already accounted for many match wins on UK rivers with impressive weights of dace and roach. However, the middle sections possess enough power to put together big catches of larger fish from pacey swims. All rods incorporate ultra slim, high quality blanks that offer a quicker response rate when casting and striking and feature comfortable EVA twist grips either side of the reel seat, which are slightly over-sized to ensure there is no void between the handle and palm to aid comfort. The upper reel seat grip also features comfortable mouldings allowing for ergonomic placement of the thumb and forefinger whilst using the reel. All rods boast a minimalist, sleek look with understated cosmetics. The guides, whippings, blank and reel seat are all finished in black giving it a sleek, uniform appearance with additional Signature detailing on the butt cap.

## > MV-R COMMERCIAL ROD SERIES

The MV-R family of Maver match rods utilise ultra slim profile blanks throughout the range. Combine the beautiful action created by these brand new, high modulus blanks with the simply stunning cosmetics and SiC guides and you have a range whose looks are only bettered by their performance! The MV-R Commercial range covers all eventualities you will encounter on commercial fisheries whether you're using an 8 or 9ft mini feeder for fishing over your pole line or 13ft waggler rods for fishing Pellet wagglers as far as you can feed. Four float & five feeder models have been developed to cover a multitude of disciplines.

## > MV-R COMMERCIAL MATCH 2 PC

These super light MV-R match rods are probably the ultimate rods for the modern day commercial fishery angler. The 2-piece ultra slim, high modulus carbon construction allows the rods to be pre-assembled & transported to the peg in Maver's ready rod holdalls, saving important time during a match fishing situation. The sublime through actions provide more than enough 'back bone' to land the 100lb + weights regularly needed in today's matches, whilst the shorter models assist casting accuracy and speed up the 'netting' of match winning fish. Finished in smart Maver livery with top quality SiC guides throughout. Line rating 3-8lb.

## &gt; MV-R COMMERCIAL FEEDER 2 PC

These really are something very special.

These high modulus feeder rods have been developed by our R & D department to cater for the ever evolving demands of today's match anglers. The non-lock through action is perfect for playing carp well into double figures yet retains the sensitivity needed for shy biting, soft mouthed skimmers. The shorter length variants available make accurate casting tight to features so much easier. Featuring a slim yet powerful blank, top quality fittings throughout and supplied with three carefully graded carbon quiver tips. Line rating 3-8lb.

## > MV-R SERIES 9 'JIGGER'

**Stem:** N/A  
**Body:** Rohacell foam  
**Eye:** N/A Inline  
**Bristle:** N/A

**NEW 20**

Based on the popular MVR series 7 design, the MVR jigger incorporates the same fully loaded base but without the stem. The float has been specifically designed for fishing shallow or when 'slapping' incorporating a narrower internal sleeve. Absolutely deadly when fishing for F1s or carp up in the water during warmer weather. Size 0.3g.

## &gt; MV-R SERIES 10

&lt; NEW 20

**Stem:** 1.0mm white fibreglass  
**Body:** Balsa  
**Eye:** Over sized side eye on body  
**Bristle:** Hollow 1.7mm

A dedicated paste float for use in the margins featuring a shorter stem than the series 11. The series 10 has been constructed with strength in mind. The stem of the float runs right the way through the body into the tip meaning it can easily withstand the rigours associated with margin fishing. Also boasts a wrap around eye which the tip passes through to help prevent the eye from being pulled out of the body and an additional eye located at the top of the bristle to help minimise tangles. Size 0.2g.

## &gt; MV-R SERIES 11

&lt; NEW 20

**Stem:** 1.0mm white fibreglass  
**Body:** Balsa  
**Eye:** Over sized side eye on body  
**Bristle:** Hollow 1.7mm

The new MV-R series 11 was designed for use in deeper water, featuring a longer stem than the series 10. Constructed with strength in mind, the stem of the float runs right the way through the body into the tip meaning it can easily withstand the rigours associated when fishing for big fish with paste. Boasts a wrap around eye which the tip passes through to help prevent the eye from being pulled out of the body and an additional eye located at the top of the bristle to help minimise tangles. ## > MV-R FINESSE FLOAT SERIES

The MV-R Finesse range of commercial pole floats have been designed & tested by Welsh International angler Lee Edwards primarily for snake lakes & refined commercial fishing. All floats are constructed from rohacell foam bodies and incorporate the ground breaking nitinol wire stems. These floats are virtually indestructable under normal use. When bent the stems simply return to a dead straight wire, vastly reducing breakages. Nitinol has unique properties - **SME** (shape memory effect) & **SE** (super elasticity).

### > MV-R FINESSE SERIES 1

**Stem:** 0.6mm nitinol wire  
**Body:** Rohacell foam  
**Eye:** Stainless steel side eye  
**Bristle:** Hollow 1.5mm

Classic body shape featuring a 0.6mm nitinol wire stem and 1.5mm high visibility hollow bristle and super hard finish makes this ideal for strung out spotting patterns or small bulks. Ideal for carp, F1's and silverfish. Sizes 0.1, 0.2, 0.3, 0.4 and 0.5 gram.

## &gt; REALITY POLE FLOAT SERIES 1, 2 &amp; 3

&lt;NEW 20

The new Reality series pole float range offers both reliability and durability in spades. Hand finished by Europe's top float manufacturer incorporating high quality materials and a super strong construction which sees the stem of the float running right the way through the body of the float itself and sleeved into the bristle. By designing the float in this way with the back of the eye sat against the fibreglass stem, it is very unlikely the side eye will ever be pulled out of the body. With 3mm hi-vis bristles fitted throughout the range this new commercial float series will appeal to the masses!

## &gt; REALITY SERIES 1

**Stem:** 1mm white fibreglass  
**Body:** Balsa  
**Eye:** Over sized power side eye  
**Bristle:** Hollow 3mm

The Series 1 incorporates a classic diamond-shaped body offering great stability in cross winds. Featuring a 1mm white fibreglass stem and a high visibility 3mm thick bristle, this pattern is best suited to fishing to depth with the thick bristle aiding presentation when offering large hookbaits such as meat, pellet or corn. Sizes 0.3g, 0.4g, 0.5g, 0.6g & 0.75gram.

## &gt; MV-R MONOFILAMENT

A sensational range of high-tech, low diameter MV-R monofilaments that are already a huge seller. Every mono is micrometer perfect and boasts incredible knot strength. The breaking strengths are excellent and utilise high abrasion resistant materials. The lines are incredibly smooth, water resistant and extremely durable. All our mono is UV resistant and memory free. Manufactured in Japan and spooled in Italy.

## &gt; MV-R HOOKLENGTH

Without doubt the best hooklength we have ever seen! Tested vigorously by our International consultants over the last 12 months and set to be the number one hook line for commercial fishing. The linear strength is amazing with exactly the correct amount of stretch to buffer those quick surges from bonus carp. Has many characteristics similar to fluorocarbon. Available in 10 popular sizes the MV-R hooklength mono is spooled onto compact 50m spools to make for easy drawer storage.

- Excellent breaking strain
- High abrasion resistant material
- Extremely smooth coating
- Virtually memory free
- UV resistant
- Very high knot strength
- High performance
- Supplied on 50m spools

## &gt; MV-R RIG MONO

MV-R rig mono is the ideal pole rig line. It's incredibly strong for its diameter with a very impressive knot strength. It's clear colour reduces its visibility and the controlled stretch acts as a shock absorber when large fish are hooked. Totally waterproof and fully UV protected. Available in 8 popular sizes the MV-R rig mono is spooled onto 150m spools.

- Excellent breaking strain
- High abrasion resistant material
- Extremely smooth coating
- Virtually memory free
- UV resistant

## &gt; STONE RIVER MONO

Back by popular demand! The fast sinking Stone River monofilament. Perfect for feeder fishing! The mono boasts low stretch resulting in an almost hybrid-like performance offering the best of both braid and monofilament. Casting is smooth so longer distances on the cast are assured. The zero stretch properties help make bites when using this line extremely positive. Incredible linear and knot strength. Available in both 150 metre and huge 600 metre spools.

## &gt; DUAL BAND MONO

Back by popular demand! A unique monofilament composed of two different lines fused together during the manufacturing process. The strength of this mono is nothing short of incredible and the memory is virtually zero. The perfect hybrid between braid and mono offering very little stretch. Use as a main pole line or as a reel line that offers punch on the cast, but provides the qualities of braid for sky-biting skimmers at distance.

> JURASSIC CLASSIC REEL MONO

> PROFILE 8 BRAID

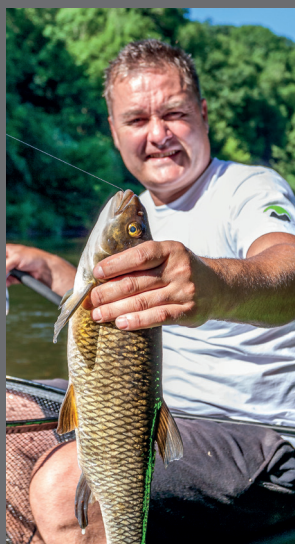

Maver Jurassic Classic co-polymer 300m match reel line. Super strong with controlled elasticity means bite indication is superb & it also prevents hook pulls at the net. Combine this with a low diameter, micrometer perfect and fantastic knot strength and you see why this impressive line has become a firm favourite.

Constructed from eight interwoven strands which maintains that all important round profile very rarely found on other braids as well as a smooth finish to enable the angler to cast greater distances. Finished in a low visibility green makes this braid excellent for all aspects of our sport whether feeder fishing for bream or long range carp fishing. With exceptional knot strength, very high abrasion resistance & zero stretch.

# FEEL THE POWER OF THE DARKSIDE

## > DARKSIDE BEACHCASTERS

The Maver Darkside beachcasters are designed by our team of sea consultants across Europe with the emphasis on lightness and power incorporating the very best quality components. Manufactured by Reglass using ultra high modulus (UHM) carbon blanks, S.T.E.R (super toughened epoxy resins) complete with the world famous black Suncore finish. All the Darkside rods have Fuji Alconite K series guides and newest Fuji NS reel seats. We believe these are the greatest casting rods ever developed, but don't take our word for it. Go out and try one today, you are certain to be very, very impressed!

> DARKSIDE SPIGOT 3 PIECE >>>>>>>>>>

The Darkside spigot beachcasters have been built using Reglass's unique carbon technology. All are furnished with Fuji Alconite K series guides and Fuji NS reel seats. These rods will simply amaze you. The super slim yet incredibly powerful blanks developed for fishing at very long distance will punch leads to the horizon with ease. The tubular carbon tip allows the use of big leads without losing any sensitivity.
